

PRODUCT OVERVIEW

The original Timber® captured the thrill of incredible Short Takeoff and Landing (STOL) capabilities in a design featuring sporty flight performance and ultra-friendly handling. From low-time to very experienced pilots, nearly everyone enjoys flying the Timber—but some wish it had even more aerobatic capability. The E-flite® Timber X 1.2m combines the STOL capabilities of the original model with a new wing design featuring oversized ailerons and flaps, plus an enlarged rudder and elevator and a more powerful 3S and 4S compatible power system, to also deliver 3D performance you'd expect from an all-out aerobat!

FEATURES

- Incredible Short Takeoff and Landing (STOL) plus 3D capabilities
- Enlarged and oversized control surfaces with double-beveled hinge lines
- Six durable and factory-installed high-torque, metal-gear servos
- High-power 3S and 4S compatible brushless outrunner motor and 50-amp ESC
- **BNF Basic Only** - Spektrum™ 6-channel receiver with industry-leading DSMX® technology
- Unmatched stability and precision of AS3X® technology for smoother flight performance
- Easy to fly with optional-use SAFE® Select flight envelope protection
- Shock-absorbing landing gear with oversized tundra-style wheels
- Functional and factory-installed LED landing, navigation and strobe lights
- Lightweight yet durable composite-reinforced, hollow-core EPO construction
- Optional-use leading edge slats for improved STOL and slow flight performance
- Optional EDO-style floats (EFL5261, sold separately)

NEEDED TO COMPLETE

- **BNF Basic ONLY**
Full-range, 6+ Channel DSMX®/DSM2® transmitter
- **PNP ONLY**
Full-range, 5+ channel transmitter and receiver
- 2200–3200mAh 3–4S LiPo flight battery (EFLB22003S30 or EFLB22004S30 recommended)
- Compatible LiPo charger
