

## PRODUCT OVERVIEW

Your vehicles are extremely durable, why not your transmitter? The Spektrum™ DX5 Rugged™ 5-channel surface transmitter redefines radio control with a level of durability to match the tough conditions off-roaders, bashers and boaters encounter constantly. Based on the superbly ergonomic design found on the popular DX5C and competition favorite DX5 Pro. From there, we integrated cordless power tool feature ideas for the die-hard punishment those products endure. The result is a class-leading RC system with unmatched durability in addition to other innovative features that unite with a level of precision, versatility and convenience you won't want to play without.

## FEATURES
