

BNF BASIC PNP PLUG-N-PLAY

FEATURING SAFE 

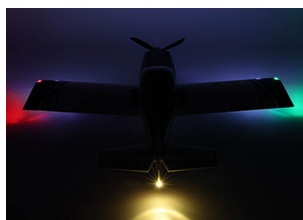

A-EFL01850/75 RV-7 1.1m BNF Basic / PNP

Officially licensed by Van's Aircraft, the E-flite RV-7 1.1m offers low-time to experienced RC pilots a conveniently-sized, well-equipped, and easy-to-fly scale model of the iconic general aviation aircraft. It's capable of slow and scale-like flying, sport flying, plus high energy aerobatics — and with the optional-use SAFE Select technology in the BNF Basic version, the RV-7 1.1m also makes a great “next step” as a first low-wing or scale model for pilots who have successfully mastered learning to fly with a trainer. The factory-installed brushless power system features a specially-tuned motor and 3-blade prop that deliver an abundance of thrust with a 3S LiPo battery, or more speed and unlimited vertical performance when using a 4S pack. With 2200–3200mAh Smart and non-Smart batteries, the exclusive 45-amp Spektrum Avian Smart Lite ESC can provide a variety of real-time power system-related telemetry data including motor RPM, current, battery voltage and more via compatible receivers (such as the AR631 included with the BNF Basic version) and Spektrum AirWare equipped transmitters.

FEATURES 

- Officially licensed replica
- Specifically designed and equipped to offer scale-like and sport flying, high speed and aerobatic capabilities
- Specially tuned motor compatible with 3S and 4S batteries
- 45-amp Spektrum Avian Smart Lite ESC provides real-time battery voltage, motor RPM and other data via compatible receivers and transmitters
- Taildragger configuration landing gear for operation from a variety of surfaces including grass
- Functional flaps for shorter takeoffs/landings and improved slow-speed handling
- 5-channel control with six (6) digital servos and linkages
- Factory-painted and finished in a modern and scale-like trim scheme
- Lightweight yet durable composite-reinforced EPO construction
- Fast and easy bolt-together assembly – no glue required
- LED navigation & landing lights
- Easy to install/remove one-piece wing

NEEDED TO COMPLETE 

BNF Basic

- Full-range 5–6+ channel Spektrum DSMX compatible transmitter

PNP

- Full-range 5+ ch. radio and receiver
- 3S 11.1V or 4S 14.8V 2200–3200mAh LiPo with EC3 or IC3 Connector
- Compatible LiPo charger

IN THE BOX 

- (1) E-flite RV-7 1.1m with:
 - (1) Avian 45A Smart Lite ESC
 - (1) Brushless Outrunner Motor
 - (6) Digital Servos (installed)
 - (1) Spektrum AR631 6-Ch Receiver *
- (1) Product Manual
