

A-BLH05850 Fusion 180 LE Helicopter BNF Basic

Featuring the latest advancements in Spektrum technology, the Blade Fusion 180 Smart helicopter continues the legacy of the Blade Fusion line and is a high-performance 3D machine ready for intermediate heli pilots. The revised Fusion adds a redeveloped carbon fibre main frame that's lightweight and extremely rigid. Additionally, a belt-driven tail and newly developed tail case improves tail performance and overall durability. Hosting this belt is an over-sized tail boom large enough to eliminate the need for boom supports. Optimized servo geometry greatly reduces mechanical loss and improves control efficiency to the swashplate. A painted carbon fibre tail fin finishes the sleek styling of the Fusion 180 Smart redesigned canopy. Featuring the latest in Spektrum technology, the Fusion 180 Smart is equipped with the expertly tuned micro 6250HMX Flight Controller yet remains adjustable for pilots to fine tune to their flying style. Also, a Spektrum Avian 15 Amp ESC offers improved, precise head speed control for that high performance flight that doesn't lag behind.

FEATURES

- The Blade Fusion 180 Smart helicopter features exclusive SAFE technology, a revolutionary electronic flight envelope protection system.
- The Spektrum Avian Smart 15 amp ESC transmits Battery voltage and ESC data straight to your Spektrum Transmitter all over one wire.
- Cutting-edge Spektrum technology is featured throughout this beast from Spektrum H2070 cyclic and H2070T tail servos with Optimized Servo Geometry
- Features the new ground-breaking AR6250MHX flybarless system
- The carbon fibre main frame takes rigidity to another level for a rock-solid flight experience.
- An oversized tail boom eliminates the need for boom supports
- The Fusion 180 Smart features a belt driving tail improving durability and tail performance
- The bright colour scheme is easy to see when tearing up the sky and is sure to catch the eye of everyone at the flight line.

NEEDED TO COMPLETE

- Full-range 6+ channel Spektrum 2.4GHz DSM2/DSMX Transmitter
- 4S 450mAh Spektrum Smart LiPo with IC2 connector (or equivalent)
- Suitable LiPo Balancing Charger

IN THE BOX

- (1) Fusion 180 Smart helicopter with:
 - (1) Spektrum AR6250MHX Flybarless Flight Controller
 - (1) BL Outrunner Motor, 3900Kv
 - (1) Avian Smart 15 amp ESC
 - (3) Sub-Micro Digital Metal Geared Heli Cyclic Servos
 - (1) Sub-Micro Digital Metal Geared Heli MG Servo
- (1) Product Manual
