

A-EFL106250/A-EFL10675 Beechcraft D18 1.5m BNF Basic/PNP

The design of the "Twin Beech" D18 proved so adaptable that Beechcraft Aircraft Corporation eventually produced 32 versions — and more than 9,000 total aircraft — from 1937 to 1969. They served in a wide variety of roles from passenger transport, to mail carrier, and even as a military trainer for navigators and bombardiers. The E-flite Beechcraft D18 1.5m is the most convenient, well-equipped, and easiest-to-fly scale model of the unique general aviation aircraft yet! Its fully-moulded EPO airframe is finished with a classic trim scheme and is outfitted with numerous scale details. Functional features such as LED navigation lights, retractable landing gear, and flaps further increase its realism. The 3S and 4S compatible power system includes an exclusive Spektrum Avian Dual Smart ESC, and the BNF Basic version is also equipped with an AR631 receiver to deliver real-time telemetry data along with AS3X and SAFE Select technologies. The Beechcraft D18 1.5m turns the aviation classic into a modern-day RC marvel that's practical for a wide range of pilots to enjoy!

FEATURES

- The most convenient, well-equipped, and easiest-to-fly scale model of the unique general aviation aircraft yet
- Scale replica of the iconic aircraft flown for civilian, airline, utility, cargo, military and other uses
- Functional features including LED navigation lights, flaps, retracts, and twin rudders
- Scale details including a clear cockpit, moulded-in panel lines, and more
- Factory-installed 3S and 4S-compatible brushless motors with dual 40-amp ESC
- Fits batteries from 3200-5000mAh to deliver a wide variety of performance and flight times
- Six durable and precise digital, metal-g geared servos with factory-installed linkages
- Electric retracts for operation from a variety of surfaces including grass
- Unique 3-piece wing includes center section with main gear plus all sections feature hands-free connections
- Convenient top hatch with clear canopy, cockpit detail, and a pilot figure
- Classic factory-applied trim scheme with paint and decal finish
- Extremely durable, fully-moulded EPO airframe

NEEDED TO COMPLETE

- BNF Basic - Full-range 6-8+ channel Spektrum DSMX transmitter
- PNP - Full-range 6+ channel transmitter and receiver
- (1) 3S 11.1V or 4S 14.8V 3200-5000mAh LiPo with EC3 or IC3 Connector
- (1) Compatible LiPo Charger

IN THE BOX

- (1) E-flite Beechcraft D18 1.5m
- (1) AR631 6-Channel Receiver\*
- (1) Spektrum Avian Dual 40A Brushless Smart ESC (installed)
- (2) Brushless Outrunner Motors
- (6) Digital Servos
- (1) Product Instruction Manual
