

A-HBZ310003 Apprentice S 2 1.2m RTF Basic

The HobbyZone Apprentice S 2 1.2m is the perfect trainer because it makes learning to fly an RC airplane easier and more fun than ever before! Featuring a more “traditional” trainer design, the Apprentice S 2 is ready to help aspiring pilots get flying in almost no time at all. It’s equipped with exclusive SAFE (Sensor Assisted Flight Envelope) technology that helps to prevent overcontrol, loss of orientation and crashes so nearly everyone can learn to fly successfully. Beginner, Intermediate and Experienced modes allow you to choose the level of stability and control you need, or are ready to try, at the flip of a switch. And you can instantly return to steady flight using Panic Recovery mode with the push of a button! Oversized tyres and a steerable nose wheel make it easy to take off from and land on a variety of surfaces including grass at large parks, sports and other suitable flying fields. Or you can install the optional floats to fly from water—which adds to its versatility and capabilities!

This Ready-To-Fly (RTF) Basic version includes a Spektrum DXS controller/transmitter equipped with industry-leading DSMX 2.4GHz technology and everything else you need to fly except for a rechargeable LiPo battery and charger for the airplane.

FEATURES

- The best and most convenient traditional trainer for first-time pilots and experienced pilots who teach others to fly
- Equipped with exclusive SAFE technology that helps prevent crashes and makes it easy to learn how to fly
- Beginner, Intermediate and Experienced flight modes you can change between at the flip of a switch
- Panic Recovery mode at the push of a button to prevent loss of control
- Spektrum DXS transmitter with industry-leading DSMX technology for reliable control without interference
- Spektrum AR631 receiver with fly-by range telemetry and industry-leading DSMX technology
- Powerful and efficient brushless power system including a 30A telemetry-capable ESC
- 4-channel control with four factory-installed servos for training to full aerobatic capability
- Capable of aerobatic manoeuvres including loops, rolls and upside down (inverted) flight
- Tricycle landing gear with steerable nose wheel for operation from a variety of surfaces
- Lightweight yet extremely durable EPO construction perfect for first-time pilots
- Quick and easy assembly—no glue or special tools required

NEEDED TO COMPLETE

- 3S 11.1V 1300-2200mAh LiPo battery with EC3 or IC3 connector
- Compatible LiPo charger

IN THE BOX

- (1) Apprentice S 2 1.2m with:
- (1) Brushless Outrunner Motor
- (1) 30A Telemetry-Capable ESC
- (4) Sub-Micro Servos
- (1) Spektrum AR631 Receiver
- (1) Spektrum DXS DSMX Transmitter
- (1) Product Manual
