

- O-SPMxB2S62** 7.4V 6200mAh 2S 120C Smart G2 Pro Basher LiPo: IC5
- O-SPMxB3S140** 11.1V 14000mAh 3S 120C Smart G2 Pro Basher LiPo: IC5
- O-SPMxB3S68** 11.1V 6800mAh 3S 120C Smart G2 Pro Basher LiPo: IC5
- O-SPMxB4S10** 14.8V 10000mAh 4S 120C Smart G2 Pro Basher LiPo: IC5
- O-SPMxB4S68** 14.8V 6800mAh 4S 120C Smart G2 Pro Basher LiPo: IC5
- O-SPMxB6S68** 22.2V 6800mAh 6S 120C Smart G2 Pro Basher LiPo: IC5

Spektrum Smart Technology is proud to introduce its lineup of Smart LiPo batteries with specially formulated Graphene LiPo High Discharge Chemistry designed to provide consistently higher voltage throughout the entire run of the battery under even the most extreme amperage loads.

For RC Bashers, maximum capacity and power are key, and the new Spektrum Smart Pro Basher Series batteries deliver! The Pro series batteries allow for more capacity to be squeezed into the LiPo cells, allowing for larger mAh ratings when compared to similarly sized battery packs. The Pro Basher Series features a newly designed hardcase shell that is thinner and more lightweight, all the while staying rigid, durable, and impact resistant. This series lives alongside current Smart G1 and G2 batteries and is an upgrade to standard hardcase surface packs.

Smart Pro-Series batteries benefits include longer battery life, better performance over the life of the pack, and the peace of mind that comes from knowing your Smart battery is maintenance-free. They also store a wide variety of essential information, including:

- Battery Brand
- Battery Type
- Battery Capacity
- Battery C Rating
- Individual Cell Voltage
- Battery Temperature
- Charge/Discharge Cycles

The new case design is a thinner poly-carbonate case that allows for more mAh to be squeezed into a basher-ready form factor.

An integrated microchip allows each Smart battery to save vital information such as battery brand, chemistry, cell count, capacity, number of charging cycles, number of discharges, C rating, battery temperature, and internal resistance.

New Pro Series LiPo Chemistry features an innovative graphene polymer that provides a consistently higher average discharge voltage over the whole discharge curve. Class-leading low internal resistance offers drivers higher current per run (supplying optimum speed/power to the motor and ESC). That means bashers get less voltage sag and longer overall battery life.

FEATURES ☰

- High-capacity packs in new Pro Series case style
- Fits most 2S to 8S bashing vehicles - check battery tray size to confirm compatibility
- Simpler and safer to use
- Powerful and consistent 120C Discharge Rate
- Industry leading graphene LiPo battery chemistry
- Standard size hardcase fits most compatible bashers, crawlers and drag car models
- High-performance 5C max Charge rate for super-fast charge times without damaging the health of the pack
- Automatic Charging on Spektrum Smart charger reduces time and get you back to bashing fast
- New hardcase design is thinner, allowing for more capacity to be packed into each cell, while still providing protection to the battery even in the most aggressive basher machines
