

**C-AXI00003T1/T2** AX24 XC-1 1/24 4WS Rock Crawler Brushed RTR Green/Orange

The 1/24 scale Axial AX24 XC-1 speaks to the extreme crawlers, and to everyone who wants to be one. With the AX24 XC-1, you'll be able to crawl over bigger obstacles and pull tougher lines than you can with any other 1/24 scale rig.

The new AX24 platform provides stability, durability, high clearance, generous articulation, and everything else extreme rock crawling enthusiasts need to overcome the impossible. Flat chassis side plates with rock sliders help you move through tight formations. Long travel shocks, a 4-link suspension, and worm gear drivetrain combine for easy handling, dependable power delivery, and the ability to clear rough terrain.

Then there's the unique AX24 4-wheel steering system. Following tightly to the line that leads from "here" to "there" has never been easier. Three transmitter-activated steering modes — for no rear tyre input, mirrored rear tyre input, or "crab crawl" — provide the flexibility you need to manoeuvre over or around almost anything in your way. This system gives all drivers new terrain conquering ability!

**FEATURES**

- Three 4-wheel steering (4WS) modes give drivers new terrain conquering ability.
- Side plate chassis allows greater articulation for improved handling over rough terrain.
- LED rock lights mounted in the rock sliders keep your path visible in low light.
- Long travel coilover shocks keep wheels on the ground to maximize traction.
- 4-Link front and rear suspension reduces axle steer and torque twist.
- Front and rear lockers with worm gear setup increase ground clearance.
- Steel front and rear axles, stub axles, and dog bones provide strength.
- Splined and sleeved drive shafts increase suspension travel.
- Hinged body system offers easy access to on-board components.
- Rockster wheels and Rock Lizards tyres produce trail-taming traction.
- No bushings — the entire vehicle features sealed bearings.
- Dynamite 88T motor provides the torque to conquer steep climbs.
- Fully equipped — you can hit the trails almost immediately!

The included Spektrum SLT3 transmitter is ergonomically designed for fatigue-free driving and has a foam wheel for precise fingertip control.

**IN THE BOX**

- (1) Axial AX24 XC-1 1/24 Scale 4WS RTR Rock Crawler
- (1) Spektrum SLT3 2.4GHz 3-Channel Radio System
- (2) Axial AS-1 Servo
- (1) Spektrum 2-in-1 ESC/Receiver Combo
- (1) 0.5 Amp USB Charger
- (1) Dynamite 88T Brushed Motor
- (1) Dynamite 350mAh 2S 7.4V LiPo
- (4) AA Transmitter Batteries
- (1) Product Manual
- (1) Miscellaneous Tools

**NEEDED TO COMPLETE**

- Nothing — everything needed is included in the box.
