

# DESIGNED TO DO IT ALL

## A-HAN7035 Pawnee Brave 20cc ARF

Piper Pawnee ag and utility airplanes have earned a reputation for friendly handling while being capable of everything from crop dusting to towing gliders, banners and beyond. The Hangar 9 Pawnee Brave 20cc is a giant-scale ARF model of the larger, more powerful, and more capable Pawnee Brave variant. It can be powered with an electric motor, glow, or petrol engine to deliver a wide range of performance from scale-like to sport aerobatic flying capabilities. Functional flaps improve slow-speed handling while also offering versatile takeoff and landing abilities. LED landing lights and a clear canopy add to the scale look and flying experience, while tundra-style wheels/tires make it possible to fly from paved, dirt, gravel, and grass surfaces. The factory-applied UltraCote film and painted-fibreglass parts finish saves you time and looks great, plus the two-piece, plug-in wing makes it easy to transport and store.

### FEATURES

- Expertly constructed with laser-cut balsa and plywood
- Two-piece, plug-in wing and horizontal stabilizer make field assembly fast
- Functional flaps and add realism and a wider flight envelope
- Painted fibreglass cowl
- Matching painted aluminium landing gear
