

C-AXI03028 1/10 SCX10 PRO Scaler 4WD Kit

With the 1/10 scale SCX10 Pro 4WD, Axial answers the call for an innovative, easy-to-build scale crawler kit that fuels the competitive spirit with top-level performance on the trails. Every component designed for the Pro kit helps you win comps by taking and conquering tough lines.

Whether your aim is to compete or you just want to drive the best of the best, the SCX10 Pro 4WD is the kit for you. The Pro crawler arrives thoughtfully engineered to deliver the highest level of performance - steadily following your chosen course over sidehills and steep rock climbs while supplying the confidence that can only come from knowing there's almost nothing your rig can't do.

The lightweight, highly adjustable Pro chassis is a comp-specific design that's optimized for climbing, side hilling, and break over. The multi-piece axles are built with steel tubes and can accommodate a chassis-mounted (CMS) or axle-mounted (AMS) servo. The motor mount positions the motor low and forward in the chassis for improved weight distribution. It also allows you to underdrive the rear axle via servo or to manually lock the rear axle in 1:1 or underdrive.

FEATURES

- The easiest, most convenient way to build a scale crawler for competition, with numerous innovations never before offered in a single kit.
- Pro kit saves significant time and money compared to buying components separately.
- Comp-ready chassis is lighter, lower, and more adjustable, optimizing performance for climbing, side hilling, and break over.
- Multi-piece steel tube axles can accommodate a servo on the axle (AMS) or chassis-mounted (CMS)
- Low and forward motor position provides superior weight distribution and improves balance.
- Underdrive the rear axle via servo or manually lock the rear axle in 1:1 or underdrive.
- New aluminium smooth body, oil-filled shocks provide higher clearance.
- The Pro has already won and placed at multiple events with designer Wyatt Mellon at the wheel.

IN THE BOX

- (1) SCX10 Pro Kit
- (1) Product Instruction Manual

NEEDED TO COMPLETE

- (1) 2- to 4-Channel Radio & Receiver
- (1) Rock Crawler Motor
- (1) Electronic Speed Control
- (1) Steering Servo
- (1) Body for SCX10 Pro Chassis
- (4) Wheels with 12mm Hex
- (4) Tyres to Fit Wheels
- (1) Micro servo for optional use of shift-able underdrive
