

A-EFLU8950 UMX Turbo Timber Evolution BNF Basic

The E-flite UMX Turbo Timber Evolution is a scaled-down ultra-micro version of the extremely popular Turbo Timber Evolution 1.5m! It's also an updated and upgraded version of the best-selling UMX Turbo Timber that features a reinforced airframe and stronger linkages to handle the added power, performance, and capability the new 2S and 3S compatible power system delivers. It's equipped with LED landing, navigation, and strobe lights, delivers real-time battery voltage and other telemetry to compatible transmitters, plus it can be equipped with the optional UMX floats (sold separately). And because of its ultra-micro size, the UMX Turbo Timber Evolution can be flown outdoors in many yards, parks, and sports fields – or even indoors in gymnasiums and other suitable spaces! It's affordable, convenient, capable – and easy to fly – which makes it a great choice for a wide range of pilots interested in a flying experience they can't get with any other model.

FEATURES

- Incredible Short Takeoff and Landing (STOL) plus sport flying and aerobatic capabilities
- Uniquely capable and versatile so it can be flown in more places and smaller spaces
- 2S and 3S compatible motor and ESC for a wide range of performance
- Reinforced airframe with stronger and more precise ball-link equipped linkages
- Real-time battery voltage telemetry with compatible Spektrum transmitters
- Spektrum receiver with industry-leading 2.4GHz DSMX technology
- Easier to fly with optional-use SAFE Select flight envelope protection
- Unmatched stability and locked-in feel of AS3X technology for smoother performance
- Optional-use leading edge slats for improved STOL and slow flight performance
- Functional and factory-installed LED landing, navigation and strobe lights
- Oversized tires for the ability to take off and land on a variety of surfaces
- Optional floats (sold separately; EFLUA1190) for flying from water
- Functional oversized flaps for shorter takeoffs and landings
- Fully factory-assembled and ready to fly right out the box

NEEDED TO COMPLETE

- Compatible 6+ Channel Spektrum Transmitter
- 2S 7.4V or 3S 11.1V 280–300mAh LiPo with JST-RCY Connector
- Compatible LiPo Charger

IN THE BOX

- (1) UMX Turbo Timber Evolution with:
 - (5) Linear Servos
 - (1) Brushless Outrunner Motor
 - (1) Spektrum Receiver with BL ESC
 - (1) Set of Leading Edge Slats
 - (1) Product Manual
