

**A-EFL23850 / A-EFL23875** Twin Timber 1.6m BNF Basic / PNP

The E-flite Twin Timber 1.6m offers the same easy handling and STOL capabilities Timber models are known for – along with additional benefits, performance, and unique abilities due to its twin power setup – to make it the most capable, durable and stable Timber yet! The specially-tuned motors are compatible with popular 3S and 4S 2200–5000mAh batteries and are matched to an exclusive “dual” Spektrum Avian Smart ESC. The BNF Basic version is also equipped with an AR637TA receiver to deliver real-time telemetry data – plus differential thrust and reversing for unique aerobatic and other capabilities – along with AS3X and SAFE Select technologies. The airframe is finished in a fresh and modern trim scheme that features functional flaps plus LED landing, navigation, and strobe lights. It also includes optional-use leading edge slats and can be flown from water using the optional floats (sold separately)

**FEATURES**

- Incredible STOL plus sport and aerobatic flight capabilities
- 40-amp Spektrum Avian Dual Smart ESC provides real-time battery voltage, temps, and other data via compatible receivers and transmitters
- Differential thrust and reversing for special ground handling and aerobatic capabilities
- 3S-4S compatible outrunner motors with counter-rotating 3-blade props
- Convenient top hatch with large battery compartment to fit 3S 2200mAh to 4S 5000mAh batteries
- Two-piece wing with composite wing joiner plus a custom-designed clip in the fuselage to hold the joiner when the wing is separated
- Oversized control surfaces with double-beveled hinge lines for added control and aerobatic capabilities
- Functional flaps can travel both ways for optional use as full-span ailerons
- Optional-use leading-edge slats for improved STOL and slow flight
- Durable shock-absorbing landing gear and oversized wheels/tyres
- Functional and factory-installed LED landing, navigation, and strobe lights
- Lightweight yet durable composite-reinforced EPO construction

**NEEDED TO COMPLETE**

- **BNF Basic** - 6-8+ channel Spektrum DSMX compatible transmitter
- **PNP** - 5+ channel radio and receiver
- 3S 11.1V or 4S 14.8V 2200-5000mAh LiPo with EC3 or IC3 Connector
- Compatible LiPo charger

**IN THE BOX**

- (1) E-flite Twin Timber 1.6m with
- (6) Spektrum Metal-Geared Servos
- (2) Spektrum Outrunner Motors
- (1) Avian Dual 40A Smart Lite ESC
- (1) AR637TA 6-Channel Receiver\*
- (1) Optional-Use Leading Edge Slats
- (1) Product Manual
