

B-PRB08046 PCF Mark I 24" Swift Patrol Craft RTR

Though detailed enough to simply enjoy on display, the Pro Boat PCF Mark I is also equipped to execute daring missions at your local lake or pond. Two 390 brushed motors with aluminium heatsinks supply the muscle to move easily at scale speeds and maneuver with finesse. The included Spektrum SLT3 radio and 40-amp ESC/RX 2-in-1 provide dependable control of the on-board electronics — and let you operate the boat's LED lights right from the transmitter.

In addition to the lights, there are plenty more faithful scale features on the moulded ABS hull. These include a .50 caliber gun on the bow, M60 machine guns, and a .50mm gun on the transom, plus life rings, docking tires, light pods, antennas, rail chains, and a flag. Eager to take its accuracy to an even higher level? The PCF Mark I comes ready to upgrade for an optional rotating machine gun turret (servo and custom transmitter required).

Out of the box, the Pro Boat PCF Mark I arrives expertly painted and finished with an accurate military trim scheme that enhances the boat's scale realism and its ready-to-run ease. Just add your choice of 3S LiPo battery and charger and you're ready for patrol.
