

**A-EFL02050** SR-71 Blackbird Twin 40mm EDF BNF Basic with AS3X and SAFE Select

The Lockheed Martin SR-71 “Blackbird” is one of the most unique and iconic aircraft of all time. Developed in the 1960s to fly faster and higher than all other airplanes and missiles of the time, the SR-71 holds world records for sustained altitude (85,069 feet) and speed (2,193.2 mph/Mach 3.3). With the E-flite SR-71 Blackbird Twin 40mm EDF, you can own a replica that’s scaled to be practical for more RC pilots to afford and fly! It’s compatible with popular 4S 2200mAh batteries and is equipped with exclusive Spektrum AS3X and optional-use SAFE Select technologies to make it the easiest to fly Blackbird yet. Optional-use fixed landing gear with a steerable nose wheel makes it easy to taxi, takeoff, and land on smooth surfaces, or you can leave the gear off for more speed and vertical performance when flying over grass. Best of all, it arrives factory-finished and nearly ready to fly right out of the box to offer an authentic SR-71 flying experience you can’t get anywhere else!

**FEATURES**

- An officially-licensed replica of the infamous SR-71 Blackbird
- Twin 40mm fans and outrunner motors compatible with popular 4S 2200mAh 30+C batteries
- Real-time overall battery voltage, current and other telemetry data via compatible transmitters
- Spektrum receiver with fly-by range telemetry and industry-leading 2.4GHz DSMX technology
- Easier to fly with innovative and optional-use SAFE Select
- The unmatched stability and locked-in feel of exclusive AS3X technology
- Four factory-installed servos for separate aileron, elevator and nose gear steering control
- Take off from and land on smooth surfaces using the included landing gear plus steerable nose wheel
- Utilize the moulded-in finger grips plus automatic Hand Launch Assist Mode when flying over grass or other suitable surfaces
- Fully-moulded and extremely durable EPO airframe with plastic and composite reinforcements throughout
- Includes an extra set of optional-use, red-painted vertical fins that snap into place for improved visibility
- Almost completely factory-assembled and ready to fly right out of the box
- Factory-applied, fully-painted finish with optional-use “Habu” decal

**NEEDED TO COMPLETE**

- Full-range 5+ channel Spektrum DSMX compatible transmitter
- 4S 14.8V 2200mAh 30+C LiPo with EC3 or IC3 Connector
- Compatible LiPo charger

**IN THE BOX**

- (1) E-flite SR-71 Blackbird EDF with:
- (4) Spektrum Linear Servos
- (2) Spektrum BL Outrunner Motors
- (1) Spektrum Control Unit with (1) Receiver and (2) Brushless ESCs
- (1) Product Manual
