

A-HBZ05300 Duet S 2 RTF

Learn to fly radio-controlled (RC) airplanes successfully with the HobbyZone Duet S 2! Even if you've never flown an RC airplane before, this ultra-micro class model is a great choice for a smaller trainer that can be flown in large yards, small parks, soccer fields, and other suitable spaces where larger models can't typically be flown by first-time pilots. It's equipped with Horizon Hobby's exclusive and innovative SAFE (Sensor Assisted Flight Envelope) technology that helps to prevent overcontrol, loss of orientation, and crashes so nearly everyone can learn to fly successfully! Beginner and Experienced modes allow you to choose the level of stability and control you need, or are ready to try, at the push of a button/stick. It also features telemetry capabilities that send flight battery voltage to the transmitter to make the pilot better aware of approximately how much "power" remains while flying. Three-channel operation offers elevator (climb/descend), steering, and throttle control, while the twin electric motors deliver plenty of power plus differential thrust to turn.

This Ready-To-Fly (RTF) model includes everything needed to fly in one box and is a perfect choice if you're a new RC pilot!

FEATURES

- An updated and upgraded version of one of the best-selling and lowest cost hobby-quality trainer models available for learning to fly RC airplanes
- 100% complete and ready to fly right out of the box – there's nothing extra to buy, provide, or assemble
- Now equipped with exclusive SAFE technology that helps prevent crashes and makes it even easier to learn Beginner and Experienced flight modes you can easily change between at the push of a button/stick
- Ultra-micro sized to fly outdoors in parks, at sports fields, or even indoors over a basketball court
- Provides telemetry data to the controller/transmitter indicating flight battery power remaining
- Transmitter with 2.4GHz technology for reliable control without interference
- 3-channel operation for complete control over climb/descend, steering, and throttle
- Twin electric motors for easy operation including differential thrust to turn
- 1S 3.7V 150mAh LiPo battery and USB charger for easy recharging
- Take off from and land on smooth surfaces using the landing gear
- Remove the landing gear to easily hand launch then land on grass or other suitable surfaces
- Lightweight yet durable and repairable construction perfect for first-time pilots
- Replacement/spare parts plus additional batteries available

NEEDED TO COMPLETE

- Nothing! Everything you need to fly and begin having fun is included!

IN THE BOX

- (1) HobbyZone Duet S 2 525mm
- (2) Electric Motors
- (1) Receiver, ESC and Servo Control Unit
- (1) Transmitter with 2.4GHz technology
- (4) AA Alkaline Batteries (for the radio)
- (1) E-flite 150mAh 1S 3.7V LiPo Battery
- (1) E-flite 1S LiPo Battery USB Charger
- (1) Duet S 2 525mm Product Manual
