

**A-EFL0350** Slow Ultra Stick 1.2m BNF Basic with AS3X and SAFE Select

Inspired by similar "Stick" models from the past and based on the more modern-day design of Ultra Stick models, the Slow Ultra Stick is a "slow flyer" that also offers a wide range of performance and capabilities to deliver a unique flying experience unlike any other model available today! Use a 2S battery for slow flying indoors in large gymnasiums and other suitable spaces, in many gardens, at most parks and sports fields - and to perform basic aerobatics including loops, rolls, and inverted flight. Or use a 3S 1300-2200mAh battery to hover and perform even more aggressive aerobatics thanks to the stiff and fully-moulded EPO tails and wing with a semi-symmetrical airfoil. You can even install a second aileron servo to take advantage of the added capabilities flaperons and spoilerons offer. The Slow Ultra Stick is simple yet extremely capable while also being incredibly easy to fly for low-time pilots looking for a perfect "Next Step" after a trainer model and for experienced pilots looking for a model that offers a no hassles "mild to wild" flight experience they can't get with any other model.

**FEATURES**

- Specially tuned brushless motor compatible with 2S and 3S batteries without the need for modifications
- Popular and affordable 1300-2200mAh batteries deliver a wide range of performance and flight times
- 30-amp Spektrum Avian Smart Lite ESC provides real-time battery voltage, motor RPM, and other data via compatible receivers and transmitters
- Optional-use motor reversing for special ground handling and other capabilities
- Spektrum AR630 receiver with fly-by-range telemetry
- Easier to fly with innovative and optional-use SAFE Select flight envelope protection
- The unmatched stability and locked-in feel of exclusive AS3X technology
- Three factory-installed digital servos plus the option to add a second aileron servo to utilize flaperons/spoilerons
- Durable and stiff fully-moulded, composite-reinforced EPO stabs plus a two-piece wing with a semi-symmetrical airfoil
- Fast and easy bolt-together assembly - no glue, tape, or rubber bands required
- Landing gear slides into place for easy installation, removal, and replacement
- Oversized tyres for the ability to take off and land on a variety of surfaces

**NEEDED TO COMPLETE**

- (1) Full-range 4+ Channel Spektrum DSMX Compatible Transmitter
- (1) 2S 7.4V or 3S 11.1V 1300-2200mAh LiPo with IC3 or EC3 Connector
- (1) Compatible LiPo Charger

**IN THE BOX**

- (1) E-flite Slow Ultra Stick 1.2m
- (3) Spektrum A345 Digital Servos
- (1) Spektrum Brushless Outrunner Motor
- (1) Avian 30A Smart Lite Brushless ESC
- (1) Spektrum AR630 6-Channel Receiver
- (1) Product Manual
