

# High Performance in a Micro Size

**A-BLH6950** InFusion 120 BNF Basic with AS3X and SAFE

The InFusion 120 is an all-new design from the Blade team engineered for next-level durability and performance. Featuring an oversized direct-drive power system, no gears are driving the main rotor, allowing for instant power and lower parts count. For intermediate to experienced heli pilots looking for high-performance capabilities in a small size, the InFusion 120 packs a punch perfect for thrilling aerobatics while flying in gymnasiums, backyards, and beyond. The InFusion 120 is easy to see while tearing up the sky with a one-piece canopy that's factory-finished in a vivid trim scheme and bright white landing gear. The factory-installed all-in-one ESC, flight controller, and receiver unit takes advancements from Spektrum Smart Technology and our latest flight controller algorithm to effortlessly provide valuable telemetry feedback and stable yet maneuverable flight capabilities.

**FEATURES**

- Brushless outrunner main and tail motors deliver instant power in a simple design with no gears
- AS3X Technology Smooths out the effects of wind with no control limitations for nearly unlimited basic to 3D aerobatic capability
- Optional-Use SAFE Technology With automatic self-leveling to make flying a collective pitch helicopter easier
- Progressive Flight Modes Allow you to grow with this heli while building your collective pitch flying skills
- Recover the helicopter to a level attitude with the flip of a switch/press of a button
- Smart Technology Provides valuable telemetry feedback to compatible Spektrum transmitters
- Long Throw Linear Servos are nearly indestructible with fast and precise control response
- Ridged ABS Airframe is lightweight yet durable for high crash resistance and easy repairs
- A vivid canopy and white landing gear make it easy to maintain orientation

**IN THE BOX**

- (1) Assembled Blade InFusion 120
- (1) Instruction Manual

**NEEDED TO COMPLETE**

- 6+ Channel DSMX Transmitter
- 300mAh 2S 7.4v 30C+ LiPo Battery with JST-PH connector
- Suitable LiPo Charger
