

B-PRB08053T1/T2 Recoil 2 18" Brushless Deep-V RTR Shreddy/Heatwave

From the moment they first hit the water, Pro Boat Recoil deep-Vs took the RC boating world by storm. With the Recoil's easy operation, even hobby newcomers could rip across the lake like seasoned pros. Pro Boat then added fuel to the fire with the awesome looks, incredible performance, and advanced self-righting capabilities of the next-generation 26" Recoil 2. Its massive success has inspired Pro Boat to create the Recoil 2 18" - a smaller, lower-priced version with the same exciting performance and supercharged style.

The compact Recoil 2 18" fits easily into your car to take wherever a suitably sized body of water waits. It also fits conveniently into a backpack of your choice, for carrying to those epic small ponds that require a hike. It's not for your backyard pool, but will be right at home cutting loose at your local pond or small lake. With its ready-to-run simplicity, custom Heat Wave or Shreddy liveries, and worry-free self-righting, the Pro Boat Recoil 2 18" deep-V brings big fun to mini RC boats!

- FEATURES**
- Incredible deep-V styling and performance
