

C-AXI90074T1/T2 1/10 Wraith 1.9 4WD Brushed RTR Orange / Black

The Axial Wraith 1.9 4x4 is a new, 1/10 scale, ready-to-run platform that delivers it all - technical rock crawling prowess and detailed scale looks. Take the wheel and take command over mud, rocks, sand, and through any kind of backyard terrain!

At its foundation the Axial Wraith 1.9 4x4 is the first full tube frame chassis in RC, providing the durability you need for aggressive action on tough terrain. Refining the proven 2.2 Wraith chassis design, Axial improved the ground clearance for this version by reducing the size of its skid plate and lower rails. Boatsides on the skid plate improve handling by helping the vehicle slip through and past obstacles.

It comes factory assembled and requires only a battery pack with IC3connector, compatible battery charger, and four AAs for the included Spektrum 2.4GHz transmitter.

FEATURES

- Strong tube chassis with forward mounted battery position
- Boatsides/skid plate for extra clearance
- Chassis-mounted servo for a realistic look
- Easy access to electronics, and adjustable battery tray
- New body design with LED lights, and grille, radiator, fender, and V8 engine details
- Spektrum™ Transmitter and Receiver
- Licensed 1.9 Nitto Trail Grappler M/T tyres on KMC XD229 Machete crawl wheels
- Compact AX10™ transmission
- AR44™ hi-pinion axles for added ground clearance
- WB8 HD Wildboar™ driveshafts
- Dual slipper clutch with 32-pitch gearing
- 4-Link rear suspension

NEEDED TO COMPLETE

- 2-3 Cell LiPo or 5-9 Cell NiMH/NiCd battery with IC3/EC3 connector
- Compatible battery charger
- (4) AA Alkaline batteries

IN THE BOX

- (1) Axial Wraith 1.9 1/10 4WD RTR with:
- (1) Spektrum™ SRX200 Receiver (installed)
- (1) Tactic® TSX45 Metal Gear Servo (installed)
- (1) Axial® 35T Electric Motor (installed)
- (1) Dynamite® Electronic Speed Control with Drag Brake (installed)
- (1) Spektrum™ STX2 Transmitter
- (1) Product Manual
