

**PRODUCT OVERVIEW**

Looking for the best vehicle to get started in the RC Hobby? The Losi® 22S SCT RTR is the perfect vehicle for new RC enthusiasts looking to capture the thrills of big air, blazing speeds, and responsive cornering. Based on the Team Losi Racing® 22T race platform, the 22S SCT features all the fun and performance of its predecessors making it the perfect Ready-to-Run vehicle to not only maximize performance bashing in the backyard, street or park, but to be the perfect entry level race truck for your local R/C race track. The Losi engineering team applied the race-proven suspension geometry of the TLR 22SCT to the 22S SCT, giving it the handling ability needed to maximize performance everywhere. The powerful Dynamite® 12T 550 brushed motor provides great torque and top speed that will keep drivers coming back for more. With officially-licensed Magnaflow and Kicker Audio trim schemes, the 22S SCT looks the part while it's tearing up the terrain or crossing the finish line. Designed to be user-friendly, the electronics are hard mounted and the battery is loaded through the bottom of the chassis to help create a hassle-free user experience. Additionally, several Team Losi Racing 22 platform performance parts are available to upgrade the vehicles performance and style.

**FEATURES**

- All New Race-inspired 2WD Platform
- Dynamite® 60A FWD/REV ESC
- Dynamite® 12T 550 brushed motor
- Bottom Loading Battery
- All Metal Gear Transmission
- Oil-filled Gear Differential
- Spektrum Waterproof Servo
- Spektrum STX2 2.4GHz Radio System
- Race-Inspired Licensed Scale Body
- Officially licensed MAXXIS Razr MT Tires
- 12mm race-inspired oil filled shocks
- Team Losi Racing® Option Part Upgrades Available
