

A MUST HAVE TOOL FOR PILOTS & DRIVERS ALIKE

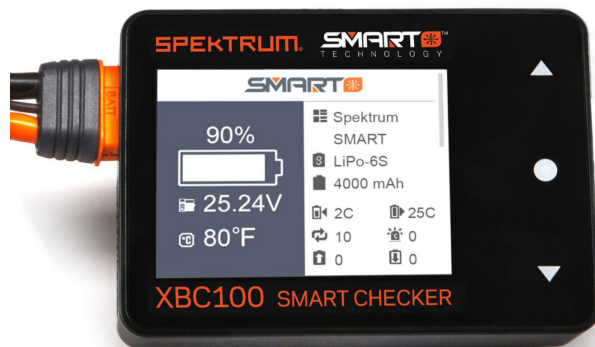

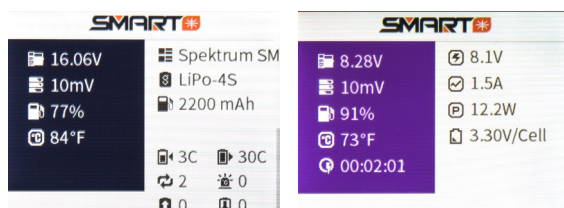

SPEKTRUM.

NEW SPEKTRUM SMART TECHNOLOGY TOOL ETA: FEBRUARY

PRODUCT OVERVIEW

The Spektrum XBC100 Smart Battery Checker is a must have tool for any pilot or drivers pit box. More than a battery checker, it features a built-in cell balancer, integrated servo tester and driver, and Spektrum Smart battery connectivity.

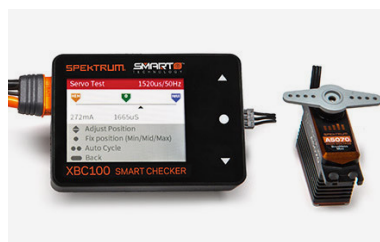

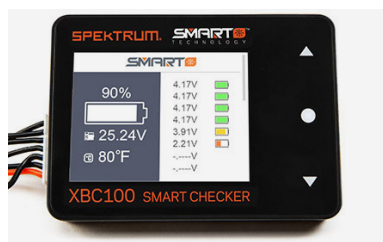

When used with a Spektrum Smart battery, you will be able to see and adjust many of the settings only available with a Spektrum Smart charger. The XBC100 features a Qualcomm 3.0 USB charge port, giving you an easy way to keep your mobile device and Spektrum Smart Transmitters charged.

Finally, all of this is displayed on a full colour IPS LCD screen that is designed to be easy to read in direct sunlight and is accessed via a user friendly touch interface.

FEATURES

- Battery checker with built in cell balancing
- Advanced Servo testing feature helps with model setup
- Spektrum Smart battery technology allows users to take advantage of Smart Battery features
- Easy to read full colour display
- Qualcomm 3.0 compatible USB power port with
- Quick Charge for compatible Android and IOS devices (up to 12v and 2 amps)
- Update port for easy access to updates and new features

MORE THAN A CHECKER

Pilots and Drivers can stay better informed about their Lipo, LiHv, LiFe and Lilon Batteries with the Spektrum XBC100 Smart Battery Checker. With the Easy to read full colour IPS LCD display, quickly see the battery percentage, cell balance, and be notified of abnormal conditions. And if your battery cells are out of balance, the XBC100 can conveniently balance each of your Battery cells to within $\pm 0.005V$ accuracy.

INTERGRATED SERVO TESTER

Built in to the XBC100 Smart Battery Checker is a helpful pwm out port that is facilitated to be used as a Servo tester. Easily check your control ranges on any modern servo or esc. Users can Test for binding and current draw right from the checker, no special in line meter required.

QUALCOMM 3.0 USB CHARGER

Keep your device charged and ready with the convenient USB power port. Just plug in a charged battery and hit start USB Charging and the XBC100 becomes a fast charging power bank ready to keep your Spektrum Smart Transmitter and mobile devices charged. Support Qualcomm QC 2.0/3.0, compatible with BC1.2 and Apple devices. Maximum output 12V/2A.
