ARRMA

Whether you are new to the hobby of Radio Control, or a seasoned RC fan, Arrma can offer you exactly what you need to take on new challenges and set yourself the goal of becoming an Arrma RC king. Designed from the ground-up by experts who understand the importance of strength, speed and incredible value.

RTR
READY TO RUN

ROLLER

EXB

CONFIGURATION

Ready-To-Run vehicles are 100% pre-built, electronics installed and wired in making this package ready for action. Additional purchases such as battery and charger may be required depending on vehicle.

A "Roller" vehicle is one that is pre-assembled but requires all electronics to get up and running. This type of vehicle is for the more experienced who are looking to install specific electronics to optimise performance.

Extreme Basher vehicles come as a rolling chassis featuring key upgrades already installed to offer the ultimate machine for hardcore bashing. As a pre-assembled rolling chassis electronics are required.

3S 11.1v LiPo **4S** 14.8v LiPo **6S** 22.2v LiPo **8S** 29.6v LiPo

THE ARRMA LIPO RATING SYSTEM

Through the Arrma range of vehicles there are a number of vehicles that are capable of handling 3S, 4S, 6S and 8S LiPo power. Each increase denotes a step up in power and performance from the power system and is rated to its highest capability. We recommend Spektrum Smart batteries and chargers for all Arrma vehicles. With the Intelligent Connector (IC3 & IC5) you will get the polarity correct every time. With the integrated microchip installed on every Smart battery and Smart Data Wire on the connector, the batteries practically take care of themselves with the charger helping to make charging easier, faster, safer and more convenient.

THE POWER SYSTEMS

550 MEGA

The brushed power systems are perfectly suited for backyard bashing with family and friends, the MEGA 550 power system provides consistent performance for RC fans who demand reliability and hassle-free running.

BRUSHED

BLX

This range of Brushless ESC's and motors provide the ultimate in performance and maintenance free bashing! Each BLX power system is rated for different high-power inputs, from 3S LiPo power up to 6S.

BRUSHLESS

SMART TECHNOLOGY
FIRMA

The Firma range delivers power and intelligence all in one. Get real time ESC and battery data without additional sensors or modules, straight to your radio when using SMART batteries and corresponding transmitter.

WATERPROOF ELECTRONICS

Bashing in wet conditions is inevitable but rest assured that the range of Arrma vehicles are highly water resistant and the electronics (ESC/Servo/Receiver Box) are waterproof, but this doesn't mean that the vehicle can be treated like a submarine! If you run your vehicle in wet conditions you must carry out wet conditions maintenance in accordance with the manual the car comes with to prevent damage and corrosion.

OVERVIEW

Fast, rugged and factory-built, the 2S LiPo compatible ARRMA GRANITE 4X4 MEGA RTR comes ready to bash on any terrain. This version features new equipment that further increases the original monster truck's already impressive performance and durability. This version of the 1/10 scale monster truck now includes a 3-channel Spektrum SLT3 radio, a more powerful steering servo, higher capacity 8.4V NiMH battery for longer run times and blistering performance out of the box.

OVERVIEW

The SENTON 4X4 MEGA RTR SCT is built for exciting bashing speeds and extreme, all-terrain durability. New features enhance its unstoppable performance and include a stronger chassis and retained hinge pin plates; steering with more clearance for stones; a castellated slipper pad and sliding gear mesh; and rubber shielded bearings throughout. These design improvements coupled with the new Spektrum SLT transmitter and included battery and charger make this the ideal package for anyone looking to get a start in RC.

OVERVIEW

All NEW Handbrake!
 The chassis includes a module for a rear vented disc brake and a powerful Spektrum SPMS650 brake servo. You control the handbrake from a convenient switch on the DX3 transmitter for thrilling drifting, "hooning" and stunt action.

Take high-speed street bashing performance to another level. The ready-to-run INFRACTION 6S BLX 4WD 1/7 scale truck tops off a tough and powerful ARRMA brushless platform with stunning style — ideal for intermediate-level drivers who are eager to experience street bashing at 80+ MPH speeds (achievable in optimum conditions using a 6S LiPo and the included speed pinion gear). Its Spektrum DX3 radio and Smart brushless power system components provide real-time telemetry that also helps you reach and maintain maximum performance.

OVERVIEW

Experience the speed and durability of ARRMA bashing in a big way with the 1/7 scale, 6S capable MOJAVE EXtreme Bash Desert Truck 4WD Roller. The tough-as-nails anodised aluminium chassis has been reinforced with aluminium front and rear chassis braces and a tower-to-tower center brace for maximum durability. Bumpers and nerf bars supply impact protection on all sides. Thanks to an independent suspension with bump-soaking oil-filled shocks, the truck handles equally well over wicked or well-travelled tracks. It's fully assembled and ready to accept your choice of powerful electronics.

OVERVIEW

The ARRMA KRATON Extreme Bash Roller Speed Monster Truck adds extra toughness everywhere it counts, making this 1/8 scale chassis the perfect platform for high-speed bashing over brutal terrain. It's fully assembled and ready to accept your choice of powerful electronics. Its aggressive dBoots Copperhead 2 tyres arrive mounted on multi-spoke wheels with durable hubs to deliver all-terrain traction — assisted by a high downforce wing that adds an aggressive edge to the look of the exclusive EXB matt and gloss effect finished truck body.

The Extreme Bash Roller vehicles offer the ultimate basher the very best in strength and durability on their favourite RTR platforms. Roller Completion Level comes with chassis assembled and ready to customise with your choice of electronics.

RECOMMENDED ACCESSORIES

All the items on these pages are ideal upgrade or accessory items that will give you the very best from your ARRMA vehicle.

SPEKTRUM

The Spektrum lineup of products has grown to encompass every technological element of your RC hobby, all the while offering a higher connection through the development of DSMR, AVC and SMART technologies.

A RADIO TO MATCH YOUR BASHING NEEDS!

Your vehicles are extremely durable, why not your transmitter? The Spektrum DX5 Rugged 5-channel surface transmitter redefines radio control with a level of durability to match the tough conditions bashers encounter constantly.

SPMR5200GEU
DX5 Rugged 5 Channel DSMR Transmitter Only Green Edition

SPMR5200
DX5 Rugged 5 Channel DSMR Transmitter with SR515 Receiver

SPMR5200OEU
DX5 Rugged 5 Channel DSMR Transmitter Only Orange Edition

Breakthrough Steering Control
The DX5's integrated thumb-lever innovatively makes it possible to steer one-handed and with a higher-level of precision.

Built-In Telemetry
The built-in telemetry capability can give you real-time information on things like your vehicle's battery voltage, signal quality, motor temperature and more.

Convenience
A built-in side compartment offers tool storage, and two lanyard mounts are supplied so you can be hands-free in an instant.

SPMBT2000
BT2000 Bluetooth Module

Simply install the Spektrum Bluetooth module to your Spektrum DX3 transmitter and download the Dashboard app to your smart device to view real-time telemetry data like never before (when used in conjunction with telemetry capable receivers and Firma ESC's). In addition to live data, drivers can make even more indepth and fine adjustments to servo settings, such as travel, sub trims and auxiliary switch settings, right from the Dashboard app! Making it possible to fine tune your vehicle to your liking easy and hassle free.

SMART TECHNOLOGY

Smart technology ensures that all of your model's electronics work together seamlessly for the greatest efficiency and performance. It keeps you aware of every component's status, boosts your confidence in its capabilities, all while making vital components of your model easier to use than ever.

When charging a Smart LiPo, unique parameters and health of that battery is viewable on the charger. The combination simplifies charging and informs of usage and maintenance decisions.

Smart batteries practically take care of themselves while storing unique data and programming and storage options to custom tailor the Smart LiPo battery to your needs.

Firma ESCs not only gather the data but also send it to your transmitter in real time, instead of only storing it for after-run study. You're able to adjust settings as needed to boost performance on the go.

Smart enabled transmitters offer a way to view live data fed back from your Smart ESC's, providing a plethora of data that can prove vital when in use

FIRMA SMART ESC

ONE-WIRE TELEMETRY

WATERPROOF & DUSTPROOF

EC3/EC5 COMPATIBLE WITH IC3/IC5

With Firma Smart ESCs, you'll be better connected to your vehicle than ever before - without installing extra components that all work independently of each other. You won't need extra wires, modules, or links. A Firma electronic speed control provides a one-wire solution for obtaining telemetry data such as RPM, temperature, battery voltage and capacity.
