LOGIC RC

ARRMA

Whether you are new to the hobby of Radio Control, or a seasoned RC fan, Arrma can offer you exactly what you need to take on new challenges and set yourself the goal of becoming an Arrma RC king. Designed from the ground-up by experts who understand the importance of strength, speed and incredible value.

ALL speeds advertised in this publication are achievable in optimal conditions, using high spec LiPo battery with optional speed pinion if applicable. Please consult the manual for further details.

RTR
READY TO RUN

ROLLER

EXB

CONFIGURATION

Ready-To-Run vehicles are 100% pre-built, electronics installed and wired in making this package ready for action. Additional purchases such as battery and charger may be required depending on vehicle.

A "Roller" vehicle is one that is pre-assembled but requires all electronics to get up and running. This type of vehicle is for the more experienced who are looking to install specific electronics to optimise performance.

Extreme Basher vehicles come as a rolling chassis featuring key upgrades already installed to offer the ultimate machine for hardcore bashing. As a pre-assembled rolling chassis electronics are required.

3s 11.1v LiPo

4s 14.8v LiPo

6s 22.2v LiPo

8s 29.6v LiPo

THE ARRMA LIPO RATING SYSTEM

Through the Arrma range of vehicles there are a number of vehicles that are capable of handling 3S, 4S, 6S and 8S LiPo power. Each increase denotes a step up in power and performance from the power system and is rated to its highest capability. We recommend Spektrum Smart batteries and chargers for all Arrma vehicles. With the Intelligent Connector (IC3 & IC5) you will get the polarity correct every time. With the integrated microchip installed on every Smart battery and Smart Data Wire on the connector, the batteries practically take care of themselves with the charger helping to make charging easier, faster, safer and more convenient.

2s

3s 4s 6s

3s 4s 6s 8s

THE POWER SYSTEMS

550 MEGA

The brushed power systems are perfectly suited for backyard bashing with family and friends, the MEGA 550 power system provides consistent performance for RC fans who demand reliability and hassle-free running.

BRUSHED

BLX

This range of Brushless ESC's and motors provide the ultimate in performance and maintenance free bashing! Each BLX power system is rated for different high-power inputs, from 3S LiPo power up to 6S.

BRUSHLESS

SMART TECHNOLOGY FIRMA

The Firma range delivers power and intelligence all in one. Get real time ESC and battery data without additional sensors or modules, straight to your radio when using SMART batteries and corresponding transmitter.

WATERPROOF ELECTRONICS

Bashing in wet conditions is inevitable but rest assured that the range of Arrma vehicles are highly water resistant and the electronics (ESC/Servo/Receiver Box) are waterproof, but this doesn't mean that the vehicle can be treated like a submarine! If you run your vehicle in wet conditions you must carry out wet conditions maintenance in accordance with the manual the car comes with to prevent damage and corrosion.

L: 695mm W: 310mm H: 200mm

ARA7615V2T1/T2 INFRACTION - 1/7TH 4WD 6S BLX STREET BASH RESTO MOD TRUCK RTR

Take high-speed street bashing performance to another level. The INFRACTION 6S 1/7 scale truck tops off a tough and powerful ARRMA brushless platform with stunning style — ideal for intermediate-level drivers who are eager to experience street bashing at 80+ MPH speeds (achievable in optimum conditions using a 6S LiPo and the included speed pinion gear). Underneath those streamlined Street Bash Looks is a chassis which proves to the world, once again, that ARRMA builds the most durable bashers.

HANDBRAKE

The chassis includes a module for a rear vented disc brake and a powerful Spektrum SPMS650 brake servo. You control the handbrake from the DX3 transmitter for thrilling drifting, "hooning" and stunt action.

 Bigger than big and engineered for brute power and toughness, the KRATON 8S takes your bashing ability to the next level. Its metal-reinforced design lets you blast up, over, and through bruising obstacles without worry. Metal shafts, turnbuckles and outrives, plus all-metal internal gears, give the drivetrain and suspension system unstoppable strength. The supplied Spektrum DX3 and SR6100AT AVC receiver take full advantage of the innovative telemetry technology found in the included Spektrum Smart Firma brushless motor and ESC.

Height: 266mm

KRATON EXB LARGE SCALE FULL OPTION ROLLER

BIG EXTREME SPEED BASH

- ROLLER
- METAL GEARS

- EXB PARTS LIST**
- EXB 7075 T6 5mm aluminium chassis
 - EXB Red-Anodized aluminium front brace mount
 - EXB Front bumper with impact absorbing design
 - Exclusive EXB matte and gloss effect body
 - Heavy-duty shocks with 6mm thick shock shafts
 - Heavy-duty 7mm thick steering turnbuckles and 8mm thick rear suspension upper link turnbuckles
 - Heavy-duty COPPERHEAD 2 tyres
 - 47T and optional 39T spur gear
 - Servo mounts for 1/5 and 1/6 servos
 - 15T and 17T servo saver adaptors
 - Heavy-duty servo saver springs
 - Aluminium rear lower chassis brace
 - Centre body support and brace

ARA52088 KRATON - 1/5TH 4WD EXTREME BASH SPEED TRUCK ROLLER
 The KRATON 1/5 4WD EXTreme Bash Roller Speed Monster Truck showcases ARRMA bashing performance at its biggest and best — it's the King of all KRATONS, providing large scale bashers with the ultimate Speed Monster Truck experience. ARRMA engineers have added extra toughness everywhere it counts to make the fully assembled chassis a perfect platform for high-speed bashing over brutal terrain. Add your choice of powerful 8S brushless power system and watch it blast over punishing off-road terrain with ease.

Height: 282mm
 Width: 602mm
 Length: 771mm

- NEEDED TO COMPLETE**
- Transmitter and Receiver
 - Meal Gear High Torque Steering Servo
 - Brushless ESC, Motor
 - LiPo Battery Pack
 - Compatible LiPo Battery Charger
 - LiPo Safe Charge Bag

Length: 550mm

ARA8707 TALION - 1/8TH 4WD 6S BLX EXTREME BASH SPEED TRUGGY RTR

The TALION 6S BLX Extreme Bash Speed Truggy is tougher than ever before, making it the ideal choice for taking your speed bashing to the next level - with the added convenience of a fully installed, high-quality Spektrum electronics package. Topped off with an exclusive EXB matte and gloss effect finished truck body and high downforce wing, the TALION represents the highest level yet of performance and durability in the 1/8 scale 6S BLX platform.

INCLUDED IN THE BOX

TOOLS
Cross and Hex Wrenches (1, 2, 2.5, 3, 5mm)

CONTROL SYSTEM
Spektrum DX3 and SR6110AT AVC Receiver

POWER SYSTEM
Spektrum Firma 150A SMART ESC & 4074 2050Kv Motor

STEERING
Spektrum S652 metal geared waterproof servo

NEEDED TO COMPLETE

- 4 OR 6S Lipo Battery
- Compatible Charger
- Charge Bag
- 4 x AA Batteries

ARA8710 OUTCAST - 1/8TH 4WD 6S BLX EXTREME BASH STUNT TRUCK RTR

"Designed Fast, Designed Tough" may be an understatement when describing the OUTCAST 6S BLX Extreme Bash Stunt Truck. Made of strong Anodised 7075 T6 aluminium, the laser-etched chassis plate gains further rigidity from front and rear aluminium chassis braces. The short wheelbase and powerful 6S brushless power system help make performing flips and tricks a breeze. Big stunts require plenty of power, and you'll get it from the 6S-capable brushless power system's Spektrum Firma 4074 2050Kv Brushless Motor with ARRMA heatsink.

NEEDED TO COMPLETE

- 4 OR 6S Lipo Battery
- Compatible Charger
- Charge Bag
- 4 x AA Batteries

ARA5810B OUTCAST - 1/5TH 4WD 8S BLX STUNT TRUCK RTR

Driven by 8S brushless power and an ARRMA-tough design, the OUTCAST 8S BLX 4WD delivers the torque, acceleration and speed you need for extreme action in 1/5 scale. This ready-to-run stunt truck comes equipped to defy gravity right out of the box. From the heavy-duty front bumper to the wheelie bar in back, it's engineered to do it all: long, tall wheelies; tight, fast donuts; standing and aerial backflips; high leaps into the air and more - over all terrain, in all conditions.

Smart Battery Level

DX5C TRANSMITTER

The amazing DX5C is the perfect savvy solution for bashers, boaters and scalers who want a staggering list of advanced features that includes the virtually unlimited possibilities 5-channel control offers. Built around frequency-agile, DSMR 2.4GHz technology, you can use the DX5C in any type of surface application, including boats. Its range and response, particularly in noisy 2.4GHz environments, are superb.

DX5C RUGGED TRANSMITTER

To conquer the wild, the DX5 Rugged gives you 5-channel versatility and hosts an array of auxiliary switches for lights, winches and more. Its interface features an innovative capacitive-touch control panel that offers a greater resistance to moisture and is easy to use. Simply slide your finger over the control panel and tap to select the menus, options and values on the easy-to-read LCD display.

SPMR5200 DX5 Rugged with SR515 Receiver

The DX5 Rugged is available in Orange and Green as a transmitter only option with all the same great features.

SMART TECHNOLOGY

Smart technology ensures that all of your model's electronics work together seamlessly for the greatest efficiency and performance. It keeps you aware of every component's status, boosts your confidence in its capabilities, all while making vital components of your model easier to use than ever.

Smart enabled transmitters offer a way to view live data fed back from your Smart ESC's, providing a plethora of data that can prove vital when in use

When charging a Smart LiPo, unique parameters and health of that battery is viewable on the charger. The combination simplifies charging and informs of usage and maintenance decisions.

Firma ESC's not only gather the data but also send it to your transmitter in real time, instead of only storing it for after-run study. You're able to adjust settings as needed to boost performance on the go.

Smart batteries practically take care of themselves while storing unique data and programming and storage options to custom tailor the Smart LiPo battery to your needs.

FIRMA SMART ESC

ONE-WIRE
TELEMETRY

WATERPROOF &
DUSTPROOF

EC3/EC5 COMPATIBLE
WITH IC3/IC5

With Firma Smart ESCs, you'll be better connected to your vehicle than ever before - without installing extra components that all work independently of each other. You won't need extra wires, modules, or links. A Firma electronic speed control provides a one-wire solution for obtaining telemetry data such as RPM, temperature, battery voltage and capacity when used in conjunction with Smart batteries and telemetry enabled receiver and transmitters.

CHARGERS

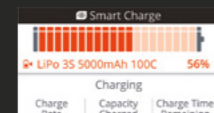

The S155 and S2200 Smart G2 AC Chargers have improved user interface, and ability to fast charge Smart batteries on either the IC3 or IC5 integrated output port, these charger offers a versatile and truly hassle-free charging experience. Its Auto Charge feature recognises your Smart battery's parameters, such as chemistry type and charge rate, and begins safe, correct charging automatically when the charge lead is connected.

SMART LIPO BATTERIES

New "Generation 2" features make these powerful LiPo packs even simpler and safer to use together with your Smart charger. Not only are charging parameters and performance data stored and uploaded automatically to Smart chargers, but no balance lead is needed — just one easy IC connection! Smart G2 batteries come from the factory programmed to discharge automatically to a safe storage voltage of 3.90V after 72 hours of inactivity.
