

C-AXI03005T1/T2 RBX10 Ryft 1/10 4WD RTR Orange / Black

The RBX10 Ryft 4WD's robust, custom tube chassis is engineered from a high-strength composite plastic that withstands the hard knocks of RC off-roading — even while moving at the high speeds produced by a strong powertrain featuring a 4S-capable, 2200Kv brushless motor. Both the front and rear axles boast a durable one-piece, molded plastic, solid axle design and metal differential cover. Licensed Interco TSL Bogger tyres on Raceline wheels, aided by long travel front and rear shocks, do their part to tame wild off-road tracks. These features, along with a full-time 4WD transmission, make the RBX10 Ryft a fun vehicle to send over the trails at full throttle.

FEATURES

- Solid axles front and rear with universal axle joints
- Robust tube chassis design
- Strong powertrain with 4S-capable brushless motor
- Full-time 4WD transmission
- Licensed Raceline wheels and Interco TSL (Three Stage Lug) Bogger tyres
- Long travel front and rear shocks
- Waterproof 15kg servo

NEEDED TO COMPLETE

- Battery and charger

IN THE BOX

- (1) Axial RBX10 Ryft 1/10 4WD RTR
- (1) Spektrum DX3 3-Channel 2.4GHz DSMR Radio Transmitter
- (1) Spektrum SR6100AT 6-Channel DSMR AVC/Telemetry Receiver
- (1) Spektrum Firma 130A Smart ESC
- (1) 2200Kv Brushless Motor
- (1) Product Manual

The DX3 radio and SR6100AT receiver also support the on-demand traction control of Spektrum AVC (Active Vehicle Control) technology — included here for the first time in an Axial RTR vehicle.
