GENERATION 2 CHARGING

“Smart” and State-of-the-Art

O-SPMXC2010 S2200 Smart G2 AC Charger 2x200W

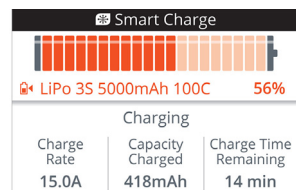

The 2-channel S2200 Smart G2 AC Charger — from the new “Generation 2” of Spektrum Smart electronics — brings today’s most advanced and user-friendly charging technology to RC pilots and drivers of all skill levels.

FEATURES

- Up to 200W power per channel or 380W on one channel for fast charging
- Charges AND balances Smart G2 batteries with one simple IC3 or IC5 connection — no separate balance lead needed
- Auto Charge recognises Smart battery charging parameters and begins safe, accurate charging automatically when connected
- Charges virtually any RC battery
- Smart software tracks and stores numerous smart battery data
- Includes IC3 and IC5 charging output ports — eliminating the need for a separate IC3 or IC5 adapter to charge Spektrum Smart batteries
- Large, 2.8” display screen
- An on-screen clock counts down remaining charge time until your Smart battery is fully charged
- Updated user interface features fresh, intuitive menus, icons and navigation tools, plus non-slip, easy to use buttons
- USB input and output ports are included for updating firmware
- ON/OFF switch eliminates the need to plug in and unplug the power cord for on/off control
- Detachable power cord makes transporting more convenient
- Includes an efficient, low-noise cooling fan
- Sleek, sturdy case fits well on a work bench and in pit or field bags
- Handy rubber grips on case make it easier to plug in and remove batteries
- IC3 and IC5 connectors are backwards compatible with EC3 & EC5 connectors

IC3 or IC5 CHARGING OUTPUT
Use the slider to select either the IC3 or IC5 port and then charge your battery - at up to 200W power per channel or 380W on one channel for fast charging.

TIME REMAINING CLOCK
In real time, a clock on the S2200 G2 AC charger’s screen counts down the minutes until your Smart battery is fully charged and ready to be used

IMPROVED USER INTERFACE
The S2200 G2 AC charger includes a large, 2.8” display and updated user interface with improved menus, icons, and navigation tools - plus non-slip, easy to use buttons

IN THE BOX

- S2200 Smart G2 AC Charger
- Power Cord
- Manual

G2 Smart Technology Charger FAQ's.

Will Smart chargers (G1 / G2) charge ANY brand of battery?
Yes – your G1 and G2 Smart charger will charge nearly any RC hobby battery. Please refer to your manual for a full listing of battery types that can be charged with your Smart charger.

How do I update my Smart G1/G2 charger?
You can find if updates are available for your Smart charger by going to www.spektrumsmart.com, searching for your model of charger, clicking on the manuals and support tab, and selecting the updating instructions link.

Can I charge two batteries on same IC3 + IC5 port on Smart G2 chargers?
No – the slider on the IC3/IC5 port of your Smart charger is designed to prevent connecting two batteries to the port simultaneously. Do not remove the slider from the IC3/IC5 port on your Smart charger.
