

GENERATION 2 CHARGING

O-SPMXC2020I S1200 Smart G2 AC Charger 1x200W

The 200W Spektrum S1200 Smart G2 AC Charger provides easy charging for all modelers, especially using Smart batteries - with Auto Charge simplicity, one-connection balancing, IC3 or IC5 output ports for adapter-free convenience, and more.

IC3 or IC5 CHARGING OUTPUT
The Spektrum S1400 Smart G2 AC Charger includes IC3 and IC5 output ports for charging your Smart batteries without adapters.

TIME REMAINING CLOCK
In real time, a clock on the S1400 G2 AC charger's screen counts down the minutes until your Smart battery is fully charged and ready to be used.

IMPROVED USER INTERFACE
To provide the easiest, most helpful, and most hassle-free charging experience, the S1400 G2 AC charger includes an updated user interface with improved menus, icons, and navigation tools.

FEATURES

- Delivers 200W power for charging
- Charges AND balances Smart G2 batteries with one simple IC3 or IC5 connection — no separate balance lead needed
- Auto Charge recognises Smart battery charging parameters and begins safe, accurate charging automatically when connected
- Charges virtually any RC battery (use Smart batteries to benefit from all charger features)
- Smart software tracks and stores numerous Smart battery data
- Includes IC3 and IC5 charging output ports — no separate adapters required to charge different Smart batteries
- An on-screen clock counts down remaining charge time until your Smart battery is fully charged and ready to use
- Updated user interface features fresh, intuitive menus, icons and navigation tools, plus non-slip, easy to use buttons
- USB input and output ports are included for updating firmware and charging secondary devices
- ON/OFF switch eliminates the need to plug in and unplug the power cord for on/off control
- Detachable power cord makes transporting more convenient
- Includes an efficient, low-noise fan
- Compact size and sleek, sturdy case
- Handy rubber grips on case make it easier to plug in and remove batteries
- IC3/IC5 connectors are backwards compatible with EC3/EC5 connectors

G2 Smart Technology Charger FAQ's.

Will Smart chargers (G1 / G2) charge ANY brand of battery?
Yes - your G1 and G2 Smart charger will charge nearly any RC hobby battery. Please refer to your manual for a full listing of battery types that can be charged with your Smart charger.

How do I update my Smart G1/G2 charger?
You can find if updates are available for your Smart charger by going to www.spektrumsmart.com, searching for your model of charger, clicking on the manuals and support tab, and selecting the updating instructions link.

Can I charge two batteries on same IC3 + IC5 port on Smart G2 chargers?
No - the slider on the IC3/IC5 port of your Smart charger is designed to prevent connecting two batteries to the port simultaneously. Do not remove the slider from the IC3/IC5 port on your Smart charger.
