

P-SPMR20110EU iX20 SE Special Edition 20-Channel Smart Transmitter

The most powerful, intelligent, and feature-packed Spektrum transmitter to date, the 20-channel iX20 has given accomplished pilots the tools they need to fly today's most advanced, high-performance aircraft. This Special Edition version includes all of the original's programming and connectivity innovations and adds exclusive upgrades, making the iX20 SE a uniquely pro-class flying experience.

Like the iX20, the iX20 SE features Hall effect sensor gimbals that offer advanced precision, low maintenance, and exceptionally smooth operation. For this Special Edition transmitter, the gimbals are constructed of premium machined aluminium that maximizes ergonomic comfort. A high-quality, lanyard style neck strap adds hands-free convenience. A Special Edition aluminium dual transmitter case is included for transporting the iX20 SE safely and in style — perfect whether you're going to the local field or to compete with the world's top pilots.

For advanced pilots who fly high-performance aircraft — this Special Edition version of the iX20 opens the door to unlimited possibilities.

FEATURES
