

A-EFLU2950 UMX Radian BNF Basic with AS3X and SAFE

The UMX Radian ultra-micro motor glider became a class favourite by delivering a unique flying experience you simply can't get from any other model. Due to its traditional motor glider design, the Radian is inherently stable and easy to fly almost anywhere — indoors in gymnasiums and other suitable spaces, and outdoors in most yards, parks and sports fields. The exclusive Spektrum AS3X technology of its installed electronics smooths out the effects of wind and turbulence to deliver a locked-in feel that makes it seem like you're flying a much larger airplane. E-flite engineers upgraded this new version to include optional-use SAFE Select technology, making the Radian even easier for more people to fly in more places. Plus, you can receive real-time battery voltage telemetry with compatible transmitters! It's the perfect next step after learning to fly, a great first glider and an exciting everyday sport model for a wide variety of pilots.

FEATURES

- Updated and upgraded version of the very popular ultra-micro motor glider that's easier to fly in more places
- Fly indoors in gymnasiums and other suitable spaces, or outdoors in most yards, parks, sports fields and beyond
- Long flight times up to 10-20+ minutes with a mix of power on/off flying using 1S 150-200mAh batteries
- Removable one-piece wing with composite spar for easy and convenient storage and transport
- Provides telemetry data to compatible transmitters to show flight battery voltage
- Easier to fly with innovative and optional-use SAFE Select flight envelope protection
- The unmatched stability and locked-in feel of exclusive AS3X technology
- Spektrum receiver with industry-leading 2.4GHz DSMX technology
- Factory-installed motor, gearbox and efficient folding propeller
- No FAA registration required (under the 250-gram weight limit)
- Factory-finished and ready to fly right out of the box

NEEDED TO COMPLETE

- 5+ channel Spektrum DSMX compatible transmitter (MLP6DSM, DXS and above)
- 1S 3.7V 150-200mAh LiPo battery with Ultra Micro connector
- Compatible LiPo charger

IN THE BOX

- (1) UMX Radian BNF Basic with:
 - Motor: Coreless w/Gearbox and Folding Propeller
 - ESC/Receiver/Servos: Spektrum Receiver, ESC and (2) Servo Control Unit (installed)
- (1) Product Manual
