

A-HAN4775 Ultra Stick 60" Plug-N-Play

The new Hangar 9 Ultra Stick PNP is the first Ultra Stick in a Plug-N-Play completion level we've ever created and offers first time balsa pilots and balsa enthusiasts' performance and flight versatility with low assembly time. The two-piece plug-in wings allows for convenient transportation and set up. Pilots can be ready to fly in much less time than it takes to charge a battery. The proven design delivers a robust platform that uniquely combines simplicity with modern updates that include top-shelf materials, quality craftsmanship and superior engineering. The factory-installed, high-power 50BL brushless motor handles a variety of LiPo batteries and the 60-amp Spektrum Avian Smart ESC provides real-time battery voltage, current, motor RPM and other data via compatible receivers and transmitters. Six factory-installed 26g digital servos deliver precise control. Featuring tried and true Ultra Stick design, it is suitable for a wide range of pilots and flying abilities. With an Ultra Stick you know you are getting incredible flight performance and flexibility.

FEATURES

- Expertly constructed with lightweight, laser-cut balsa and plywood
- Plug-N-Play Completion Level
- Tried and true Ultra Stick design
- Operational flaps for expanded flight envelope
- No glue required for assembly
- Factory-installed, high-power 50BL brushless motor handle a variety of Lipo batteries
- 60-amp Spektrum Avian Smart ESC provides real-time battery voltage, current, motor RPM and other data via compatible receivers and transmitters
- Fits 6S batteries from 3200-5000mAh for mild to wild sport performance
- Six factory-installed 26g digital servos for precise control
- Large top hatch for fast and easy access to the battery compartment
- Tail dragger landing gear adds to its sportier looks
- Two-piece plug in wings for easier transportation and field assembly
- Covered in genuine Hangar 9 UltraCote
- Float-ready-hard points for mounting the E-flite Carbon-Z float set (sold separately) are already built into the fuselage.

NEEDED TO COMPLETE

- Full-range 6+ channel radio & receiver
- 6S 22V 3200mAh - 5000mAh LiPo Battery with EC5 or IC5 Connector
- Compatible LiPo charger

IN THE BOX

- (1) Hangar 9 Ultra Stick Electric PNP
- (1) 50-Size Brushless Outrunner Motor
- (1) Spektrum Avian 60Amp Brushless Smart ESC, 3S-6S
- (6) 26g Digital, Metal-Geared Servos
- (1) Prop and Spinner
- (1) Product Manual
