

C-AXI03025T1/T2 1/10 SCX10 II Deadbolt 4WD Brushed RTR Blue/Tan

The ready-to-run Axial SCX10 II Deadbolt 4WD is a budget-friendly, highly capable, and easily upgradeable RC rock crawler that's perfectly suited for both experienced adventurers and hobby newcomers. It combines rugged scale looks with the exceptional handling of the trail-ready SCX10 II chassis, in a 12" short wheelbase setup that's agile enough to take on twisty tracks.

The SCX10 II remains one of the best 1/10 scale rock crawler chassis ever designed. This high-strength, C-channel chassis is made of durable steel with cross braces for reinforcement and rigidity. The contoured skid plate significantly reduces hang-ups, and the simplified design makes maintenance quick and easy.

With a realistic driver figure and exterior cage the Axial SCX10 II Deadbolt 4WD delivers scale excitement and class-leading performance. Nearly all electronics, including a Spektrum SLT2 2.4GHz radio system, motor, and ESC, are supplied and installed. Just add your choice of batteries and charger and start your adventure!

FEATURES

- Realistic, durable steel C-channel chassis with cross braces design
- Single-piece AR44 front and rear axles with moulded truss for durability
- High pinion design that adds ground clearance, improves driveshaft angles, and increases gear surface contact
- LCX AX10 transmission with adjustable gearing ratio for super high speed or competition-level crawling speed
- Universal joint axles allowing up to 45° of steering and providing an efficient, high-performance drivetrain
- Optimized gear ratio of 3.75 that reduces torque twist
- Hypoid-cut CNC metal gears
- Larger load rated bearings
- 8° Kingpin axle eliminates tyre scrub
- 10° Increment adjustments for knuckle carriers and straight axle adapters
- Chassis mounted servo with adjustable servo mounting system
- Oil-filled, coilover shocks with threaded shock bodies
- Licensed CRC front bumper
- 3-piece WB8 HD Wildboar front and rear driveshafts with strengthened slider-floater tube to reduce flex and fatigue
- Easy-access, water-resistant receiver box

NEEDED TO COMPLETE

- (1) 2-3S LiPo with EC3 or IC3 connector
- (1) Compatible Battery Charger

IN THE BOX

- (1) SCX10 II Deadbolt 1/10 Scale RTR
- (1) Spektrum SLT2 2.4GHz Radio System
- (1) Dynamite 35T 540 Brushed Motor
- (1) Spektrum 40A Brushed ESC with IC3 Connector
- (1) Spektrum SLR300 SLT FHSS Receiver
- (1) Spektrum S614 WP Metal Gear Servo
- (1) Product Manual
- (4) AA Transmitter Batteries
