

FUN SCALE PT-19

THE PRIMARY WWII TRAINER

A-HAN3180 Fun Scale PT-19 PNP, 56.5"

Hangar 9 brings one of the primary trainers used in World War II designed for RC sport and scale pilots looking to transition from foam models to balsa. Although not a trainer, RC pilots with a bit of time behind the sticks will love how the new Hangar 9 Fun Scale PT-19 PNP handles in the air. Foam RC pilots will be familiar with the PT-19 brushless outrunner power system, enjoy a wide variety of battery options, and easy field assembly. It features lightweight balsa and plywood construction and is finished in genuine UltraCote that's long-lasting and easy to maintain. The two-piece, bolt-on wings allow for convenient transportation and setup. Pilots can be ready to fly in less time than it takes to charge a battery. At the workbench, the PT-19 assembly is easy, with only standard tools needed. All you need to do is bolt the model together, install the receiver, charge a battery and fly. The new Hangar 9 Fun Scale PT-19 PNP is a balsa model with outstanding sport-plane flying characteristics at a great value.

FEATURES

- Expertly constructed with lightweight, laser-cut balsa and plywood
- Plug-N-Play Completion Level
- Fits a wide variety of battery options to provide a wide range of performance and flight times.
- No glue is required for the main assembly, and it can be ready to fly in less time than it takes to charge a battery
- Painted fibreglass cowl
- 60-amp Spektrum Avian Smart ESC provides real-time battery voltage, current, motor RPM, and other data via compatible receivers and transmitters
- Factory-installed 4250-600Kv Brushless Outrunner Motor
- Optional-use landing gear fairings and pilot increase the realistic appeal
- Four factory installed Spektrum A391 servos
- Large top hatch makes access to electronics and batteries convenient.
- Two-piece, bolt-on wings for more accessible transportation and field assembly
- Covered in genuine Hangar 9 UltraCote film
- Efficient 14 x 8.5 wood propeller included for 4S Lipo battery powered. (5S and 6S LiPo batteries require a propeller change).

NEEDED TO COMPLETE

- (1) Full-range, 6+ channel transmitter and receiver
- (1) 4S 14.8V to 6S 22.2V 2200-5000mAh LiPo Battery with EC5 or IC5 Connector
- (1) Compatible LiPo charger

IN THE BOX

- (1) Hangar 9 PT-19 PNP
- (1) Spektrum Avian 60 Amp Brushless Smart ESC
- (1) 4250-600Kv Brushless Outrunner Motor
- (4) Spektrum A391 39g Digital Servo
- (1) 14x8.5 Wood Electric Propeller
- (1) User Manual
