

C-AXI03030T1/T2 SCX10 III Base Camp 1982 Chevy K10 4X4 RTR Blue/Black

Even casual automotive enthusiasts instantly recognize the Chevy K10 pickup. Although its straight-lined appearance earned it the "square body" nickname, the iconic truck was also among the first C/K generations to be optimized by computers and wind tunnels for lower drag and improved fuel economy. The result was a beautiful and rugged classic that you can now drive for yourself with the Axial SCX10 III Base Camp 1982 Chevy K10.

The officially licensed Proline Chevy K10 stepside body comes expertly factory-painted and detailed. Axial matches the accurate scale looks with equally impressive durability and performance. The SCX10 III steel C-channel chassis is strong, realistic, and easy to maintain. Included AR45 portal axles add high ground clearance. The rugged LCXU transmission, with full ball bearings and all-metal internal gears, works with portal or standard axles. And the list goes on, with an optimized suspension, tunable oil-filled shocks, a trail-tough drivetrain, and much more.

FEATURES

- Factory assembled and ready to run
- Strong SCX10 III steel C-channel chassis
- High clearance AR45 portal axles
- Durable LCXU transmission
- All-metal pivot balls
- All-metal gears
- Full ball bearings
