

A-HBZ6100/A-HBZ6150 Apprentice STOL S 700mm RTF with SAFE / BNF Basic

The HobbyZone Apprentice STOL S 700mm has been scaled down from the incredibly popular Apprentice 1.5m and 1.2m models, yet has also been optimized to offer STOL capabilities similar to the best-selling E-flite Timber series models. Plus, it's "ultra-micro" sized to be more affordable and convenient for more people to fly in more places and smaller spaces - from yards and parks to sports fields and beyond! The Apprentice STOL S 700mm is equipped with Horizon Hobby's exclusive and innovative SAFE technology that makes it possible for almost anyone to learn to fly successfully. Beneath its durable exterior, there's an efficient brushless motor along with a factory-installed ESC, receiver and servos. The RTF version also comes with everything else needed to fly in the box including a Spektrum battery, charger, and an SLT6 controller/transmitter equipped with a USB-C port for direct connection to a PC for easy plug-and-play use of the included trial version of the RealFlight Trainer Edition RC flight simulator!

Both versions are 100% complete and nearly ready to fly right out of the box.

The RTF version comes with radio, battery, charger and AA's

FEATURES

- Ultra-micro sized to fly in large gardens, parks, at sports fields
- Equipped with exclusive SAFE technology that helps prevent crashes and makes it easy to learn how to fly
- Beginner, Intermediate & Experienced flight modes you can easily change between at the flip of a switch
