

**C-AXI03008T1/T2 1/10 SCX10 III Jeep CJ-7 Brushed RTR Red/Grey**

While the SCX10 III Jeep CJ-7 comes engineered and equipped to take on any trail, it's the incredible scale detail that will have Axial fans eager to make it the canvas for their next rock crawling masterpiece. In addition to the officially licensed Jeep CJ-7 body, this rig features officially licensed Gen-Right bumpers and body armor, a full interior with opening centre console, a roll cage, and more. Even the wheels and tyres add to its authenticity. The wheels are officially licensed Raceline Daytona beadlocks, and the high-traction tyres are officially licensed Micky Thompson Baja Boss treads.

As part of the Axial SCX10 III family, of course, the CJ-7 is as capable as it is detailed. It's right at home out on the trail navigating scale-appropriate rock crawling obstacles. Adding to the precise handling and proven durability of the SCX10 III platform is a transmitter-activated Dig function for improved turning and control. The Dig servo is included and installed.

The SCX10 III Jeep CJ-7 arrives fully finished and ready-to-run with a factory-installed, brushed power system and Spektrum DX3 Smart transmitter. Just add your choice of 2-3S LiPo battery and charger.
