

C-AXI00002V3T3/T4 1/24 SCX24 Jeep Wrangler JLU Brushed RTR Grey/Green

The SCX24 Jeep JLU performs like a winner and looks like one, too. The realistic scale body rides on licensed KMC Machete wheels and Nitto Trail Grappler tyres. Two LEDs in the front bumper light up the trail for night-time crawling. For quick battery access, just remove one clip to tilt back the body.

Axial has updated the popular rig to make it even better. Plush oil-filled shocks have been added for a suspension that smoothly absorbs bumps and stays stable over the roughest terrain. Reliable Spektrum electronics are included, and there are two hot new body colours to choose from.

Inside the box, in addition to the assembled and finished rig, you'll find a Spektrum 2.4GHz transmitter, 350mAh LiPo battery, and handy USB charger. Four AA batteries are even included for the transmitter. The SCX24 Jeep Wrangler JLU is the complete micro rock crawling package. Think small, and get ready for big Axial adventures!
