

THE ULTIMATE micro BUSH PLANE

A-EFL13550 Micro DRACO 800mm BNF Basic

Inspired by the incredible ingenuity and effort Mike Patey put into building the full-sized aircraft, E-flite delivered the first officially licensed scale replica of his ultimate bush plane - the amazing DRACO 2.0m. Since its release, many pilots have dreamt of and asked for a scaled-down version that's more affordable, convenient, and easier to fly in more places and smaller spaces! The E-flite Micro DRACO 800mm is precisely that, and is slightly larger than UMX™ (Ultra Micro eXtreme) and other ultra-micro class models to better replicate the complex design while also including as many scale details as possible. It's still small and light enough to fly in large yards, small parks, sports fields, and beyond. Yet, it also features many surface details, including moulded-in rivets, panel lines, control surface corrugation, antennas, steps, wingtip "stinger" skids, and more. Functional features include LED navigation, landing and simulated strobe lights, flaps, and a steerable tailwheel. Oversized, tundra-style tyres on the sprung wire main gear with simulated KING shocks soak up bumps and provide excellent prop clearance while also making it possible to take off from and land on paved, dirt, gravel, and even the grass surfaces found at many parks and sports fields.

FEATURES

- An officially licensed scale replica of Mike Patey's one-of-a-kind and ultimate bush plane
- Functional scale features including flaps and LED navigation, landing, down, and other lights
- Scale details including moulded-in surface features, steps, antennas, wingtip skids, and much more
- Factory-installed 3S and 4S 300mAh battery-compatible brushless outrunner motor with 4-blade prop
- Spektrum receiver and ESC provide real-time battery voltage, current draw, motor RPM, and other data via compatible transmitters
- Easier to fly with innovative and optional-use SAFE Select flight envelope protection
- The unmatched stability and locked-in feel of exclusive AS3X technology
- Five factory-installed servos with strong and precise ball-link equipped linkages
- Large and convenient, magnetically-secured top hatch with a large battery compartment
- Steerable tailwheel plus oversized tyres for the ability to taxi, take off, and land on a variety of surfaces
- Factory-finished in a fully painted with decal trim scheme and nearly ready to fly right out of the box
- Quick and easy to install/remove one-piece wing for even more convenient storage and transport

IN THE BOX

- (1) E-flite Micro DRACO 800mm with:
- (5) Spektrum Linear Servos (installed)
- (1) Spektrum Brushless Outrunner Motor (installed)
- (1) Spektrum Control Unit with Receiver and Brushless ESC (installed)
- (1) Product Manual

NEEDED TO COMPLETE

- Full-range 6+ channel Spektrum DSMX/DSM2 compatible transmitter
- 3S 11.1V or 4S 14.8V 300mAh LiPo with JST-RCY Connector
- Compatible LiPo charger
