

# Fly the iconic "THE HUFF" Sabre

**A-EFLU7050** UMX F-86 Sabre 30mm EDF Jet BNF Basic with AS3X and SAFE Select

Designed and developed by North American Aviation, who also produced the world-renowned P-51 Mustang, the F-86 Sabre was one of the world's first jet-powered fighter aircraft. It also represented many other firsts in design and technology and was the aircraft responsible for turning the tide of air combat in favor of the United States during the Korean War. Almost 10,000 total Sabres across several variants were built, and now the E-flite UMX F-86 Sabre 30mm EDF makes it possible for more RC pilots to own and fly a replica of the iconic aircraft than ever before. It's one of the most detailed ultra-micro models ever, and because of the 4S-compatible power system, it's also the highest-performance EDF in its class yet!

## FEATURES

- A replica of one of the world's first jet-powered fighter aircraft that offers a flying experience unlike any other F-86 model
- The most affordable and convenient F-86 Sabre EDF jet model yet
- 30mm fan with a more powerful 4S-compatible outrunner motor and ESC
- Real-time battery voltage and other telemetry data with compatible transmitters
- Spektrum receiver with fly-by range telemetry and industry-leading 2.4GHz DSMX technology
- Easier to fly with innovative and optional-use SAFE Select flight envelope protection
- The unmatched stability and locked-in feel of exclusive AS3X technology
- Premium fully painted with waterslide decal finish in "The Huff" trim scheme
- Take off from and land on smooth surfaces using the installed landing gear plus steerable nose wheel
- Remove the landing gear and utilize the automatic Hand Launch Assist Mode when flying over grass or other suitable surfaces
- Completely factory-assembled and ready to fly right out of the box
- Full 4-channel control including a functional rudder

## IN THE BOX

- (1) UMX F-86 Sabre 30mm EDF
- (4) Spektrum Linear Servos (installed)
- (1) Spektrum Brushless Outrunner Motor (installed)
- (1) Spektrum Control Unit with Receiver and Brushless ESC (installed)
- (1) Product Manual

## NEEDED TO COMPLETE

- (1) Full-range 5+ channel Spektrum DSMX compatible transmitter
- (1) 4S 14.8V 450mAh 30+C LiPo with IC2 Connector
- (1) Compatible LiPo charger (plus a suitable IC2 adapter/charge lead - sold separately)
