

RACE HERITAGE & RACE READY

8IGHT-XE

C-LOS04018 1/8 8IGHT-XE 4X4 Sensored Brushless Racing Buggy RTR

Based on the back-to-back ROAR National Champion TLR 8IGHT-X platform, it's loaded with engineering that's proven to win races. The sensored brushless power system, race-legal chassis and electronics, full metal driveline, competition-caliber Spektrum S665 steering servo, and other standard features are enough to get any racer's adrenaline pumping even before the starting tone.

Its on-track performance is as aggressive as a nitro machine but with the simplicity of electric power. Keep a second charged 4S LiPo battery on hand and you'll be in and out of the pits in an instant. Because top-of-the-line TLR option parts are directly compatible, you can easily upgrade your Losi 8IGHT-XE into an absolutely indomitable buggy as your skills grow. If you're a technically minded, competitive type in search of a long-term hobby you'll love, look no further. Dive into 1/8 scale racing with the 8IGHT-XE and you'll also learn about suspension dynamics and other topics that carry over into full-scale racing.

FEATURES

- Based on the ROAR National Championship winning TLR 8IGHT-X platform
- Smooth, fast, and precise sensored brushless power racing system
- Fully race-legal chassis and electronics
- Gives first-time 1/8 scale competitors the most "bang for the buck"
- Aggressive racing performance with electric power's simplicity
