

C-LOS01026T3 1/18 Mini LMT Megalodon 2S 4X4 Monster Truck RTR

Monster Jam favourite Megalodon joins the Mini LMT lineup with proven performance in a low-cost, go-anywhere size. Megalodon offers RC monster truck fun for all ages - and from the jaws to the tail fins, it recreates the famous shark body in durable detail.

Losi introduced the original, standard size LMT platform in 2020 and immediately set a high bar for solid-axle RC monster truck performance. Then Losi brought its off-road mini RC vehicle expertise to the design table a few years later to create the first Mini LMT 4x4s. Small enough to fit in a backpack, the Mini LMTs preserve the larger LMT platform's power-to-weight ratio for the same easy handling when racing and ability to flip and wheelie in freestyle.

The Losi Mini LMT Megalodon 4x4 comes completely factory-assembled and finished. Everything required for operation is in the box, including a high-quality Spektrum SLT2 radio, high-capacity Spektrum Smart LiPo battery, and Spektrum USB-C charger for fast, safe battery recharging. For Monster Jam fans and RC hobbyists alike, the Megalodon is an easy, exciting, and affordable way to do everything you love most - from competing, customizing, and upgrading, to simply spending time with your family creating unforgettable motorsports memories.
