

A-HBZ04900 / A-HBZ04950 Champ Anniversary Special Edition 515mm RTF / BNF Basic

The HobbyZone Champ Anniversary Special Edition has been upgraded with Horizon Hobby's exclusive SAFE technology, making it easier than ever to learn to fly. SAFE helps prevent crashes by limiting overcontrol and loss of orientation, with Beginner and Experienced flight modes you can switch between instantly.

But the Champ isn't just for beginners. Its powerful electric motor delivers long flight times and can handle basic aerobatics like loops and stall turns, offering fun for both new and seasoned pilots.

The Champ comes 100% factory-assembled and ready to fly right out of the box. The RTF (Ready-To-Fly) version includes everything: transmitter, AA batteries, 1S 150mAh LiPo battery, and a USB charger. A BNF (Bind-N-Fly) Basic version is also available for those who already own a Spektrum DSMX/DSM2 transmitter and gear.

Built from lightweight, durable EPS foam, the Champ is easy to repair and supported by a full range of spare parts. Extra batteries and multi-port chargers are also available for extended flying time.

FEATURES

- A Special Edition of one of the best-selling RC trainer airplanes of all time to celebrate the 25th anniversary of HobbyZone and the 40th anniversary of Horizon Hobby
- 100% factory-assembled and ready to fly right out of the box – no assembly required
