

C-AXI-2035T1/T2 1/24 SCX24 Toyota 4Runner 4X4 RTR Orange/ Grey

Axial expands its SCX24 lineup with the highly detailed, adventure-ready 2024 Toyota 4Runner micro crawler. Based on the iconic off-road SUV, it features an officially licensed ABS hard body, oil-filled shocks, steel C-channel frame rails, and full ball bearings for scale looks and rugged performance.

With the SCX24 Toyota 4Runner, you'll have the freedom to create your own trails whether outside or indoors. Any location can be the setting for an exciting expedition. Turn your desk at work or your den at home into a formidable obstacle course. Take your 4Runner rig outside and maneuver your way through a trail filled with rocks and obstacles. With full-time 4WD, a 3-link front/4-link rear suspension, worm gears on the axles to increase the ground clearance, and Pro-Line Toyo Open Country R/T Trail tyres mounted on Pro-Line Mini Impulse Black Bead-Loc wheels this micro rig is ready to muscle over big challenges.

Whether you're a beginner or seasoned RC enthusiast, the SCX24 Toyota 4Runner delivers big performance and value in a compact, display-worthy rig.
