

C-LOS01026T4 1/18 Mini LMT Zombie 2S 4X4 Monster Truck RTR

Mini LMTs combine high performance, scale looks, and compact size—making them a hit with RC pros, car lovers, and Monster Jam fans of all ages. Now, the Losi Mini LMT Zombie brings the full-size truck's undead flair to your collection.

The injection moulded hood and polycarbonate cab are loaded with scale details that capture the full-scale Zombie in all its gory greatness. The eyes, teeth, and other artwork on the hood are recreated using a digital UV printing method for high-resolution accuracy. Hand-painted, flexible moulded rubber arms reach out to grab your next victim. Fourteen hair plugs adorn the roof of the cab and ragged cloth hangs from the bed, just like on the full-size truck. An all-new moulded roll cage design gives the body proper support.

Fully ready-to-run, the 4x4 Mini LMT Zombie needs no assembly or extras. Its solid axle drivetrain handles dirt, pavement, and indoor tracks with ease—just add ramps and obstacles for non-stop freestyle fun.
