

# DOMINATE THE FLIGHT LINE

**A-HAN28200B** P-51D Mustang 20cc ARF, 69.5"

The Hangar 9® P-51D Mustang 20cc ARF is a 1/6-scale, WWII 375th Fighter Squadron replica built from lightweight balsa and plywood for durability. It supports gas, glow, or electric power and offers exceptional flight performance.

Its satin-finish covering captures panel lines, rivets, stenciling, and accurate colors. Details include a 3D instrument panel, painted pilot figure, utility compartment, scale-shaped cowling with inlets/exhaust, spinner, and optional wing tanks. Shock-absorbing gear struts with large wheels ease grass takeoffs.

Two-piece wings fit seamlessly with the scale fillet and air scoop. Airfoiled control surfaces, factory-drilled hinges, and functional flaps allow smooth handling, short takeoffs, and slow landings. E-flite electric retracts (sold separately) can replace the fixed landing gear.

A large top hatch provides easy access, and the hardware package supports simple assembly and flexible power options. In the air, it delivers impressive performance and authentic control feel—ideal as a first warbird or a standout addition to any collection.

**FEATURES**

- Expertly constructed with lightweight, laser-cut balsa and plywood
- Finely detailed, satin-finish covering includes scale stenciling, panel lines, and more
- Two decal sets let you customize the trim in “Geraldine” or “Sky Bouncer”
- Detailed cockpit includes a 3D instrument panel, expertly painted pilot bust and more
- Rugged fixed landing gear with 4-inch wheels and realistic shock-absorbing struts (included)
- Retract ready with optional E-flite electric retracts sold separately or in money-saving combos
- Functional flaps expand the flight envelope
- Scale control surface hinge lines, gear doors, wing guns and antenna
- Updated design cowl with a more scale-like shape plus simulated engine and exhaust detail
- Scale spinner with matching paint
- Optional-use wing pylons with removable drop tanks
- Two-piece, plug-in wing for easy transport and field assembly
- Large top-hatch offers complete access to the electronics and fuel tank
- Complete hardware package includes everything for electric or petrol power

**IN THE BOX**

- Hangar 9 P-51D Mustang 20cc ARF
- User Manual

**NEEDED TO COMPLETE**

- 20-21cc two- or four-stroke gas/petrol engine or equivalent electric motor power system
- (1) Full-range 5+ channel transmitter and receiver (6+ for the retract option)
- (8) Standard-size servos (7 for the electric power option)
- (2) Batteries for receiver and engine ignition (for the gas power option)
- (1) Battery for the power system (for the electric power option)
- (1) Propeller
- (1) Tools and Adhesives
