

P-SPM6130 / P-SPMR6130 DXC+ Transmitter Only / DXC+ with SR615 Receiver

The DXC+ is the savvy solution for bashers, boaters and scalers who want a staggering list of advanced features that includes the virtually unlimited possibilities 12-channel control offers. Built around frequency agile, DSMR+ 2.4GHz technology, you can use the DXC+ in any type of surface application, including boats. Its range and response, particularly in noisy 2.4GHz environments, are superb.

The DXC+ includes new upgrades and features that makes it the ideal upgrade transmitter for RTR vehicles. Upgrades include Dual Protocol, DSMR+, 12 proportional channels and USB for easy firmware updates and compatibility with the VRC Racing Simulator.

SR615 Receiver (included with SPM6130 only)

The SR615 6-channel receiver uses frequency-agile DSMR technology for excellent range and reliability in noisy 2.4GHz environments. With a fast 5.5ms frame rate, it delivers low-latency performance for pro-level control. Epoxy potting protects against water and vibration, while binding offers SmartSafe or preset 'Gas' failsafe options.

FEATURES

- Dual Protocol (DSMR/SLT) Compatibility
- Twelve fully proportional channels with user-friendly steering and throttle mixes
- Frequency-agile, Spektrum DSMR+ 2.4GHz technology
- Backlit LCD screen for better visibility
- USB for firmware updates and VRC compatibility
- Spektrum Smart Technology ready
- Program and fine-tune compatible AVC® receivers
- 20-model memory
- Smooth, dual-ball bearing precision
- Non-slip rubber grips
- Back button makes navigating the interface more intuitive
- Steering mix, 4-wheel steering mixing, plus one assignable Mix
- Bind-progress screen displays status and frame rate
- Compatible with DSMR and DSM2* receivers
- EN328 compatible

IN THE BOX

- Spektrum DXC+ 12-Channel DSMR+ Transmitter
- Spektrum SR615 Receiver (SPM6130 Only)
- Product Manual

NEEDED TO COMPLETE

- (1) Compatible Receiver (SPMR6130 Only)
- (4) AA Transmitter Batteries

12-fully proportional channels allow for more flexibility and versatile control for auxiliary systems such as winches, lights, etc. It's also lightweight and easy to transport with all of your rigs.

USB-C port allows for easy firmware updates, plus a convenient link and connection to control VRC Racing Simulator.

The Spektrum DXC+ has many advanced programming features. So naturally it comes with advanced-level, comfortable grip, and easy to reach controls.

The SimpleScroll interface makes navigating menus and changing settings as simple as 'scroll and click.' Most users can complete programming tasks without having to look at the manual.
