

C-AXI-2048T1/T2 1/30 SCX30 Ford Bronco 4X4 RTR Rock Crawler Blue / Grey

The Axial SCX30 Ford Bronco RTR delivers impressive performance in a compact 1/30 scale package. Designed for both desktop and outdoor crawling, it combines affordability with features usually found in larger competition rigs. An angled skid plate, ramped axle housings, and high-clearance links help it glide over obstacles, while a forward weight bias adds stability on climbs. Damped shocks, full ball bearings, and a powerful Axial 88T motor ensure smooth, controlled performance.

Its detailed Ford Bronco ABS hard body, front and rear LEDs, and officially licensed Mickey Thompson Baja Boss tyres on ICON wheels bring authentic scale realism. The soft compound tyres with foam inserts provide excellent traction on dirt, rock, or even your living room floor. Ready to run right out of the box, the SCX30 Ford Bronco offers Axial enthusiasts and newcomers alike a fun, capable, and affordable way to explore new trails—anywhere, anytime.
