

# DX RUGGED+ BUILT FOR EVERYDAY ADVENTURE

**P-SPM6220** DX Rugged+ 12-Channel DSMR+ Transmitter with SR615 Receiver  
**P-SPMR6220G/O** DX Rugged+ 12-Channel DSMR+ Transmitter Only Green / Orange

The Spektrum DX Rugged+ 12-channel surface transmitter delivers extreme durability and advanced control to match the toughest off-road, bashing, and boating conditions. Built with ergonomic design and DSMR+ 2.4GHz Dual Protocol Compatibility, it connects seamlessly with DSMR and SLT receivers for versatile performance. The transmitter's capacitive-touch interface, backlit LCD, and integrated telemetry provide easy access to real-time data like RPM, speed, and battery voltage, while a USB-C port ensures simple firmware updates. Its rugged chassis is reinforced with TPU bumpers, a front guard, and no external antenna, plus water-resistant construction for all-weather reliability. Practical touches include auxiliary switches, lanyard mounts, and a tool compartment, while the off-road style steering wheel with thumb lever enhances single-handed control. Combined with AVC technology, the DX Rugged+ offers unmatched precision, durability, and adaptability for any driver or environment.

## SR615 Receiver (SPM6220 Only)

Built around frequency-agile DSMR technology, the SR615 6-channel receiver delivers superb range and response, especially in noisy RF environments where a solid 2.4GHz link is crucial. Not only is the 2.4GHz link solid, but this receiver also implements our lightning-fast 5.5ms frame rate, providing a quicker, low-latency connection for the pro-level enthusiast. Additionally, it's potted with an epoxy material to help protect the board from water and vibrations, making the SR615 water-resistant\*.

## FEATURES

- 12 fully proportional channels
- Advanced programming features, with Tap User Interface Panel
- Dual Protocol Compatibility allows easy binding with DSMR and SLT receivers
- DSMR+ 2.4GHz technology (backward compatible with DSM2)
- Backlit LED Display makes it easier to see your screen in day or night
- Bold styling that's aggressive with a focus on class-leading durability
- Smart Technology compatible
- Ergonomic options for tailoring the transmitter to your feel
- Water-resistant\* chassis design
- Dual lanyard mounts provide radio safety and accessibility
- Surrounded rubber-bumper protection
- Built-in front chassis guard offers user-inspired accessory mounting options
- Multiple mixing setups, including Motor on Axle (MOA)
- 5.5-Millisecond frame rate with compatible receivers
- Advanced programming features, with Tap User Interface Panel
- USB Connectivity for firmware updates and game controller
- Intuitive software based on user-tested functionality that's clean and simple
- Innovative thumb-steering lever makes one-hand operation safer & precise
- Non-slip removable rubber hand grip and treaded steering wheel
- Built-in telemetry
- Convenient tool storage compartment
- Programmable vibe alerts
- Program and fine-tune compatible receivers with AVC technology
- 20-Model memory

## IN THE BOX

- (1) DX Rugged+ Transmitter
- (1) SR615 Receiver (SPM6220 Only)
- (1) Product Manual

## NEEDED TO COMPLETE

- (1) Compatible Receiver (SPMR6220G/O)
- (4) AA Batteries
