

iMars D1000 Plus POWER & CONTROL

O-GACD1000P iMars D1000 PLUS G-Tech Dual Smart Charger AC 1000W

The iMars D1000 PLUS AC is a dual-output, multi-chemistry charger delivering up to 1000W for high-capacity LiPo and other battery types. Featuring G-Tech technology, it integrates seamlessly with Gens Ace G-Tech batteries for automatic detection, optimal charging parameters, and enhanced safety. Each of its two channels supports up to 25A and 500W, allowing fast, independent charging of 1S-7S lithium and 1S-18S NiMH packs. A clear 3.5-inch LCD and intuitive button layout make navigation simple, while Bluetooth connectivity enables real-time monitoring, data logging, and remote control through the Gens Ace app. The compact design includes a power button for convenience, and firmware updates are handled easily via the side USB port, which also powers external devices. The charger comes with multiple adapters and cables, making it a versatile, high-performance solution for demanding RC hobbyists.

FEATURES

- Delivers 1000W (500W per channel) and up to 25A per side for faster charge times.
- Dual XT-90 outputs let you charge two batteries simultaneously with independent settings.
- Bluetooth connectivity allows for the charger to be connected to your mobile device for data analysis of your G-Tech batteries as well as control of the settings in real-time.
- 8-Level protection ensures safe charging of your batteries everytime.
- Large, intuitive interface with push button menu and channel control.
- On/off button lets you leave the charger plugged in safely.
- Smart chip enables communication between G-Tech batteries and charger.
- Compatible with both G-Tech and standard balance lead batteries.
- Storage mode optimizes charge level to extend battery life and performance.
- DigitalPower function converts charger into a power supply for accessories.
- Test mode charges/discharges to check battery health and performance.
- USB port allows firmware updates via PC connection.
- Compact, lightweight design with folding carry handle for easy transport.

The Gens Ace App can be downloaded for free from either the App Store or Google Play Store to enable connection between the D1000 Plus and mobile device.

Dedicated On/Off Button

Dual 25A per channel Output
