

C-AXI-2260T1/T2 1/30 SCX30 Chevrolet K10 4X4 RTR Rock Crawler Green/Black

Designed with compact convenience and serious capability in mind, the Axial SCX30 Chevrolet K10 RTR delivers impressive rock-crawling performance in a 1/30 scale package suited for both indoor obstacles and outdoor trails. Despite its sub-micro size, it features competition-inspired elements such as an angled skid plate, ramped axle housings, high-clearance links, forward weight bias, damped 25mm shocks, full ball bearings, a 65T motor, and low-mounted Spektrum electronics for optimal stability and control. The detailed ABS hard body replicates the classic Chevy K10 with front and rear LEDs and licensed Interco Super Swamper tyres that provide excellent traction on any surface. Ready to run and affordably priced, the SCX30 K10 is an ideal addition for Axial enthusiasts and an accessible entry point for newcomers looking to experience big performance in a small crawler.

FEATURES

- SCX30 sub-micro crawling platform
- High-performance chassis with full-time 4-wheel drive
- Angled skid plate and ramped axle housings to slide over obstacles
- High-clearance rear links to avoid dragging and hangups
- Forward weight bias for climbing stability
- Easy-access transmission
- Officially licensed Chevy K10 scale ABS hard body
- Moulded parts for body customizing
- Clipless body mounting
- Low mounted electronics for optimal CG
- Interco Super Swamper crawler tyres on classic 5-slot mag wheels
- Damped 25mm shocks
- Full ball bearings
