C-ARA2508T1 1/16 MINI KRATON 3S RTR, Black & Red
C-ARA2508ST1/T2 1/16 MINI KRATON 3S RTR with Batt&Charg, Red&Blue / Teal&Pink

The flagship ARRMA basher welcomes a fierce new addition with the 1/16 scale ARRMA MINI KRATON 3S BLX 4X4 — lean, aggressive, and built to prove that small can still hit hard. Its compact chassis is packed with reinforced components, heavy-duty bumpers, and a bold clipless body, delivering big durability and fast pit access. Powered by a Spektrum brushless system and ARRMA's first-ever PowerGuard technology, it offers flexible performance from 30+ mph with extended runtimes to full 50+ mph 3S chaos via the PowerKey. Waterproof electronics, Dynamic Stability Control with four modes, and a throttle-limiting SLT transmitter make it adaptable for all skill levels, while its planted handling dominates asphalt, dirt, gravel, and grass. Bring your 3S LiPo and unleash full-scale excitement from the smallest KRATON ever — because this isn't just a little brother, it's the next hungry chapter in KRATON history.
