

BUILDING IS HALF THE ADVENTURE

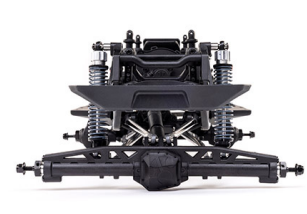

C-AXI-2755 1/10 SCX10 III 4WD Builders Kit

The Axial SCX10 III Builder's Kit is a 1/10 scale 4x4 rock crawler platform designed for RC enthusiasts who want to build and customise their own trail rig. Based on the proven SCX10 platform, this kit combines Axial's well-known durability with modern performance upgrades found in its latest models. Instead of a ready-to-run vehicle, the builder's kit provides the core components, allowing users to choose their own body, wheels, tyres, electronics, and finishing touches to create a truly unique crawler.

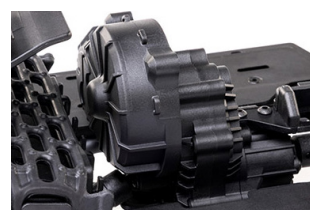

Built around a strong steel C-channel chassis, the kit features an optimised suspension and drivetrain aimed at improved trail performance. Adjustable shock towers allow multiple mounting positions to tune suspension feel and lower the centre of gravity, while high-clearance stainless steel links and durable axles provide strength on rough terrain. Additional features such as modular battery trays, boat-side sliders, and an optional DIG transmission function enhance versatility. Overall, the SCX10 III Builder's Kit offers a solid foundation for a fully personalised and capable rock crawler.

FEATURES

- Performance shock towers with multiple mounting options
- Metal panhard mount for straight and portal axles
- Single-piece rigid C-channel steel chassis
- LCXU transmission with optional DIG conversion kit included
- 6mm high-clearance stainless steel links with upgraded rod ends
- Three modular battery trays (88mm/100mm/112mm)
- Eleven universal body mounts included
- Standard AR45 straight axles
- All-metal pivot balls
- 90mm tunable oil-filled coil-over shocks
- All-metal gears
- Full ball bearings
- Accommodates a wide variety of body styles

AR45 STANDARD AXLES
